The cover art for Rayman 2: The Great Escape features the titular character, Rayman, in a dynamic pose. He is a small, orange, three-fingered creature with a large, round nose and wide eyes. He is wearing a purple tunic with a red collar and a red sash. He is surrounded by a large, stylized explosion of yellow and orange rays against a dark red background. The title "RAYMAN 2" is written in large, bold, yellow 3D letters, and "THE GREAT ESCAPE" is written in smaller, white, serif letters below it.

Armorines: Project SWARM

The time: the near future. The place: Earth.
The event: invasion!

▲ Now that is one ugly mutha! Some of the bugs in this game are huge and this isn't even one of the Queens! Run away!

In a storyline that will have the screenwriters of *Starship Troopers* reaching for their lawyers, the Earth has come under attack from a race of giant bugs. These bugs have mounted their offensive against the Earth by launching spores from their home planet and are now busy reproducing like crazy and

▲ Ah, tunnel war! That takes me back to my time in 'Nam when I used to get sent after Charlie... oh hang on, that was a movie.

killing anything that stands in their way. Enter the Armorines!

These cybernetically-enhanced troopers are Earth's last, best line of defence. With special armoured suits that incorporate complex weapon-systems, the Armorines stand the greatest (and probably the only) chance of stopping the hordes of hideous, drooling multi-limbed creatures intent on wiping out humanity.

Armorines: Project SWARM is a first-person shoot-'em-up based around the *Turok 2* game engine. In fact, think of *Turok 2* with better graphics, better weapons and thousands of huge slaving alien insects instead of

▲ Now that is a nasty cut he's got there! Fortunately we're just about to blow him to bits so he shouldn't feel it for long.

dinosaurs and you should get the general idea. The game consists of 20 missions which are set in and around five different environments: Siberia, Volcanic Island, South American Jungle, Egypt and the Hive Mothership. Each mission is compartmentalised which means it comprises a number of different levels making this a very large game indeed!

Armored Core has been in development since July 1998 at Acclaim Studios London and it's now looking very sharp. Like *Turok 2* there's a one-player mode and also a deathmatch facility in which you can take on your friends as Armored Cores and also as the giant bugs themselves! In addition, enhancements have been made to the game engine to allow an all-new two-player split-screen co-operative mode which lets you wade through all the one-player missions accompanied by a friend!

ARMORINES: PROJECT SWARM

Publisher: Acclaim
Developer: Acclaim Studios London
UK Release: December 1999

▲ As you progress through the game you come across various military and civilian personnel – usually running away!

As well as three standard weapons built into their suits the Armored Cores have access to a wide range of other gadgets and weaponry like mines, nail guns, infra-red goggles and a device called a thumper. Most of the weapons have three levels of power and the latter item, when activated, repeatedly pounds on the ground attracting all bugs in the vicinity – which is perfect for getting shot of a few grenades!

Like *Turok 2*, *Armored Core* isn't all just wandering around on foot; there are also some on-rails sections where you man the guns on a small monorail train or take the gunnery position in an *Aliens*-style dropship.

Armored Core runs with the Expansion Pak and offers hi-res and widescreen TV modes. At time of writing, Acclaim Studios is putting the finishing touches to the game but even now it's looking

pretty damn impressive, with loads of bugs on screen at any one time. With *Perfect Dark* now pushed back until at least Easter next year, *Armored Core* will be the only first-person N64 shooter about at Christmas (well, apart from *Turok: Rage Wars*) so it's bound to do well! ■

Da Crew!

For some bizarre reason there are only two Armored Cores in the game – you'd think that as they're so powerful, there would be a whole army of them, wouldn't you? Perhaps they cost too much to kit out or something! Anyway, you can basically choose to play in single-player as either the boy or the girl or in two-player as both characters. Aside from the obvious aesthetic differences each character has different abilities, notably their standard weapons.

Tony Lewis

Tony comes armed with an all-purpose blaster and a rocket launcher and his suit also has a built-in shield which can come in handy for holding off the bugs.

Myra Lane

Myra "Don't call me Lois" Lane is a little shorter than Tony and wields a melee weapon, a rapid-fire machine-gun and a grenade launcher. She's pretty darn hard!

▼ Ugh! Look at that, I've got bug bits all over my nice new suit of power armour! It'll take ages to get that muck off!

Dragon Sword

Prepare to enter a world of fantasy!

Once upon a time everything was peaceful in the beautiful lands of Avantaria – the people were happy, business was good, taxes were low and there were free karaoke machines for all (well maybe not that last bit, but the rest was certainly true). Then one day the evil Darrc Lords came to town – fed up with all the

Avantarians constantly spelling their family name incorrectly – and set about enslaving everybody.

Luckily, just down the road, the Light Gods happened to be passing and when they spotted what the Darrc Lords were up to they grabbed four adventurers, equipped them with magical Dragon Swords (the only weapon that can stop the Darrc Dragon) and sent them off to fight the Darrc Hordes – a huge army of twisted, evil Darrc Lord underlings. That done, they all settled down for a nice cup of tea...

Okay, so we're paraphrasing a little, but that's the general storyline behind *Dragon Sword*, the next N64 game to arrive from Glover developer Interactive

▲ The skeletons take one look at Aisha and quite literally go to pieces! She quite literally is drop-dead gorgeous!

Studios. We covered this game a few issues back and were extremely impressed with it even though it was still in the early stages of development. After seeing a far more advanced version, it's fair to say that now we're even more impressed!

DRAGON SWORD

Publisher: TBC
Developer: Interactive Studios
UK Release: December 1999

▲ All together now... "Look out behind you!" Things look a little bleak for Kailan as he strikes a pose, oblivious to the werewolf behind him.

▲ Never mess with a girl when she's got a sword in her hand, no matter how big you are or how much armour you're wearing!

Since our last viewing, *Dragon Sword* has come on a long way. The levels are up and working now and a number of different monsters are all roaming the colourful, detailed landscapes looking for blood. One feature which we weren't able to try out last time was the two-player co-operative mode and this too is now working – and working very well indeed. Rather than use a split-screen, Interactive Studios has instead gone for a floating camera technique which allows both players an awful lot more freedom of movement than in, for example, *Fighting Force*. When we saw it, the co-op camera had a few bugs yet to be worked out (like a tendency to wander off like a bored tourist on occasion, leaving the main characters fighting off-screen) but it's still 100% better than the camera in most finished 3-D

▲ Kailan and Aisha pose for the cover of their next album, unaware that the 'medieval look' went out of fashion six months ago.

▲ One member of the Darrc Horde regretted eating the cuddly Pokémon Pikachu for breakfast that morning.

games that we've reviewed. The one-player camera, on the other hand, is as close to perfection as it could possibly be and allows you to roam around the game at will without tumbling into unseen chasms or getting hacked down by off-screen monsters.

There's so much to be said about *Dragon Sword* that we just don't have the space for it here, so it'll just have to wait for the review. Suffice to say that everyone is more than a little excited by the first (decent) N64 co-operative beat-'em-up and can't wait for the finished code to arrive! ■

And Then There Were Four...

When last we saw *Dragon Sword* there were two main characters. Since then this number has gone up to four, giving you a wider choice of who you choose to save the lands of Avantaria. The four adventurers you can select are as follows:

Cutter

Heir to the Darrc throne and exiled commander of the Darrc Horde, Cutter's joined the good guys to fight his former allies. He's one big dude and he's got blue hair.

Kailan

Battlelord of Avantaria and Chieftain of the Naradhan Isles, Kailan is out to free the rest of his clan. He looks a lot like Cutter only he's something of a ginge.

Aisha

The adopted member of a nomadic tribe, Aisha roams the lands of Avantaria trying to uncover her unknown past. The 'talent' of the party, she's cute and very, very hard.

Gouranga

The Ogre Champion and an unbeaten warrior, Gouranga is also known as 'The One' (don't tell Christopher Lambert). He's mean, he's green and he's a fighting machine!

Rocket: Robot On Wheels

Theme park fun with some wacky robots!

▲ This is one of the later levels and it's a world of clouds and floating buildings. The only means of transport is this rather cool flying carpet!

ROCKET ROBOT ON WHEELS

Publisher:

Ubi Soft

Developer:

Sucker Punch

UK Release:

December

Rocket: Robot On Wheels is definitely shaping up to look like the next must-have N64 title, which isn't bad considering hardly anybody has even heard of it! The plot for this 3-D adventure game from Ubi Soft is very Michael Crichton-esque, centred as it is around a state-of-the-art Theme Park (*Jurassic Park* anyone?) run entirely by robots (shades of *Westworld*?) where everything goes horribly wrong (er... *Jurassic Park* and *Westworld* anyone?) Basically, the night before the park is due to open one of the two mascots, a squirrel (we think) called Jo Jo – who's jealous because he's not the star attraction – kidnaps the other mascot

Whoopee and escapes into the park, disrupting various systems along the way. With disaster looming, it's up to Rocket, a little one-wheeled robot, to go into the park and sort things out.

Like most 3-D adventure games, *Rocket: Robot On Wheels* consists of distinct levels based around a central hub. Each level represents a different part of the park and they all contain various rides and attractions which Jo Jo has disrupted. In order to track down Jo Jo, Rocket must make his way through the whole park fixing all the different rides and collecting the all-important entry tickets which allow him to move deeper into the game.

▲ Yes, you know it's a good game when one of the puzzles involves velcroing sheep to a wall! Weird...

▲ With your tractor beam you can lift objects up to a certain size. Later on you get access to this heavy lifter which can move much larger items.

► This is one of the park rides but it's not working quite as it should, which means Rocket needs to watch out for roaming bees.

The puzzles in *Rocket: Robot On Wheels* that we've seen so far are all varied and usually fairly innovative. They include physical tasks like stacking objects using Rocket's tractor beam and the incredibly realistic in-game physics, painting objects different colours to solve problems, throwing, jumping, swinging and driving a wide range of different vehicles including a mechanical fish and a flying carpet!

At time of writing, the only real problem we could find with this game was a few dodgy camera angles on some of the later levels. However, as this code is unfinished and a lot of work is still going on it's safe to assume that these little niggling problems will be sorted out by the time it comes to review. And the truth is, even with the few irritants that the game does have, it's still incredibly enjoyable. The sheer variety in the tasks

▼ In this section a robot guard won't let Rocket pass, so he needs to disguise himself using the pools of coloured paint...

One of the tasks Rocket must complete involves repairing, building and riding a rollercoaster to collect items. Once it's working you need to lay out the track, then hop into the car and take it for a spin!

that you have to do means that you never get bored and the levels are designed in such a way that you don't have to complete every task on one level to access the next. This means that you can try later levels to get yourself brand-new new powers and then go back to problems you may have got stuck on in earlier levels.

We try not to make value judgements about unfinished games in previews because the games aren't complete, but it's fairly safe to say that from what we've seen so far *Sucker Punch* is going to have to work pretty hard to make *Rocket: Robot On Wheels* a bad game! ■

▲ When you put two crystals of the same colour together they explode – which is handy if there's a wall you need to bring down.

I'd Like A Hot Dog Please!

Each level has a specific vehicle which you need to locate and activate. Once activated you can summon it at any time by touching one of the holographic projectors you find scattered around. On the first level the vehicle is a Hot Dog beach buggy!

Congratulations! You've activated the DuneDog! Steer with . Accelerate with . Brake & back up with . If you get turned over, use to right

EPGA Tour Golf

Play with the pros!

▼ Stuck in a bunker – every golfer's nightmare. Since all the courses are based on real ones, it's just as frustrating as reality!

If you're a golf fan with an N64 and you want to play a decent golf game, to date your choice has been limited to the good but not exactly realistic *Mario Golf*. Infogrames intends to change that!

EPGA TOUR GOLF

Publisher: Infogrames
Developer: Gremlin
UK Release: February 2000

▲ Realism is the name of the game with *EPGA Tour Golf*. You could almost be there, wearing awful clothes.

European PGA Tour Golf (EPGA to its friends) is a fully licensed game based on the real event. You can play around all the courses used in the EPGA tournament, challenge the world's top golfers, and have your ball-thwacking commented upon by the mellifluous

tones of the BBC's Peter Alliss and Alex Hay. We'll see how realism fares against Nintendo cutesiness in a future issue. ■

Rally Masters

Taking rallying to the limit!

▶ As the car blasted past the temple, its driver was shocked to spot the rotting corpse of Indiana Jones on a spike.

◀ Differing weather and ground conditions require different driving styles – driving on snow is certainly no picnic!

There have been several attempts over the last couple of years to bring rallying to the N64, some more successful than others. *Rally Masters* has the potential to be the best of the lot.

Developed from the PC game, *Rally Masters* is based on the Michelin Rally Masters Championship and features authentic rally drivers and 17 different cars fighting it out for skidding supremacy on nearly 50 different courses. Terrains in the game range from twisting mountain roads to dusty desert tracks, and even take drivers through steaming jungles dotted with ancient temples!

Rally Masters also supports multiple players – the press release

claims eight, though somehow it seems highly unlikely that they'll all be on-screen at once – and promises to have the best car handling system on the N64. More soon! ■

▲ The driver was confused by the strange double thump from under the car. Luckily, the spectator's camera survived.

EDITORIAL

As Christmas gets closer, software companies are bringing out their big guns – and we're not just talking about the ones in *Turok: Rage Wars* and *Jet Force Gemini*. Christmas is the time of year when more games and consoles are sold than any other, and publishers want to make sure that their games are ready to catch the attention of the people doing the buying.

What's come as a pleasant surprise to everyone at 64 MAGAZINE is the generally high quality of the games. There's usually a fair amount of shelf-fillers padding things out, but so far dodgy games have been conspicuous by their absence. Of all the new games reviewed this issue, only two score below 80%, and a quite amazing six Sizzler awards were dished out. (Certain people wanted to start dishing out the incredibly rare Gold Medal awards like sweets, but cooler heads prevailed.)

While this flood of high-quality games is gratifying because it vindicates the N64's ability to support top-class titles, it's also slightly depressing because it should have happened ages ago. Sad as it may seem, Sony's five-year-old PlayStation still looks set to dominate the market over Christmas. If the N64 had been able to field a line-up of this many excellent games back in 1997, the story might be rather different.

Still, there's no point griping about it now – better to look forward to the other games that are heading our way. Next month will hopefully see the arrival of *Donkey Kong 64* in our offices, for starters, and this is due to followed in short order by the likes of *Rainbow Six*, *Armormines*, *Ridge Racer 64* and *Resident Evil 2*, to name but a few. The N64 may not boast as many games as the PlayStation, but on the whole the quality is higher. In the end, that's what counts!

FULL COLOUR!

Say hello to the 'iN64'!

The N64. Great console, yes, but the unit itself doesn't exactly light up a room. In fact, it looks a tad morbid, what with all that black.

Well, no more! Nintendo has ripped a few pages from Apple's book, and follows the success of the multicoloured iMac with a set of new brightly-hued N64s!

The new N64s come in a range of six translucent colours, namely blue, orange, green, purple, charcoal and red. All come with a matching controller, and are the same price as the current black N64, £79.99. You'll be able to brighten up your living room with one from November 19.

READY TO WRESTLE!

Win WCW goodies!

American wrestling seems to be getting more and more popular these days and we've got a bunch of wrestling-related stuff to give away so listen up! From Warner Home Video we've got three pairs of videos, *Uncensored* (out now) and *WCW Superstar Series Volume 1: Goldberg & Sting* (due for release on November 15). We've also got three copies of *WCW Mayhem* from Electronic Arts and three WCW Interactive C-Watches from WWL that will scream various wrestling phrases to you at the touch of a button.

To win a pair of videos, the game and the watch just answer the following simple question on an interesting postcard:

MR PAC IS BACK!

Namco bundles arcade classics onto cartridge

Namco is set to follow up *Ridge Racer 64* with a second N64 title - or rather, six of them!

Namco Museum 64 will include pixel-perfect translations of the arcade classics *Pac-Man*, *Galaxians*, *Galaga*, *Pole Position*, *Ms Pac-Man* and *Dig-Dug*. Well, it might not exactly be *Tekken*, but at least it shows that one of Japan's

most important software companies is still releasing games for the N64! If you're not old enough to remember these antique games, *Pac-Man* is a blob in a maze, *Ms Pac-Man* is the same but with a bow, *Galaxians* and *Galaga* are *Space Invaders* but more so, *Pole Position* is a racing game and *Dig-Dug* is... er, weird!

DUKE GETS CHEEKY!

Did we say that?

You can't beat the art of the carefully worded quote! Check out the above advert for the 90%-rated *Duke Nukem: Zero Hour*, with prominent quotage from us. Compare this to the full sentence from which the quote was taken, which read, "As to whether it's a better multiplayer game than *Goldeneye*... eeeeeeh, no." Cheeky, eh? Next thing, we'll be seeing a *Superman* quote which reads, "Enjoyable... fun... commendable..."!

By the way, *Zero Hour* has finally gone on sale - hooray!

The latest news and rumours about Dolphin, the next Nintendo console...

If you were expecting Dolphin to appear in late 2000, when Nintendo said it would (which we weren't, to be honest) then you'll probably be disappointed. In an interview with a Japanese N64 magazine, Nintendo's game god Shigeru Miyamoto admitted that Nintendo has not yet begun programming any Dolphin titles. At the moment, the company's studios are still in the design and planning phase. Although Miyamoto said that once all the

planning was complete a Dolphin game could be programmed in a year, all of Nintendo's major N64 titles took at least twice that long to develop. Since there is no chance that Nintendo will release Dolphin without at least one killer game (hopefully more, considering how badly the N64 was hurt early on by its limited game library) this means that Dolphin is almost certain to be delayed. In contrast, Sony's PlayStation 2 has now had its Japanese launch

date set for March 2000. Nintendo is in danger of being left behind before the next-generation fight has even started! On the plus side, however, Miyamoto dropped a hint about just how powerful Dolphin will be - according to him, the new console's custom silicon has enough grunt to allow four people to play simultaneously. If you're thinking so what, so can the N64, he means four *completely different* games at once!

XPLORER 64

BLAZE • (01302) 325225 • £34.99

Up until fairly recently, if you wanted to use hardware-driven cheat codes with your N64 games you were limited to the Datel Action Replay. Now though you've got a choice, as Blaze has brought out its Xplorer 64. This works in much the same way as the Action Replay, with a few useful changes. The first is that it can handle tricky games which are coded to protect against this kind of meddling by way of four boot modes, one of which should work with any N64 title currently available.

The second new (and rather neat) thing about the Xplorer 64 is that if you've got a friend who also has one then you can download cheats from one cartridge to another by connecting them together. We tested the Xplorer on a whole host of games including *Zelda* and it came up trumps every time. To get all the new codes for the cartridge visit <http://www.x-plorer.co.uk>, or check out 64 MAGAZINE's Cheat Central!

CASES OF CHOC & TONIC TAT!

Remember in issue 31 that in our review of *Tonic Trouble* there was a picture of a popcorn maker with Paul Newman's face on it? What we didn't know at the time was that in the US the game is actually sponsored by the twinkly-eyed saladmeister, but in the UK Ubi Soft has teamed up with Nestlé Crunch. The problem was that we'd inadvertently

been given a version that didn't include the Nestlé ads. So to make up for this, Nestlé and Ubi Soft are offering 64 MAGAZINE readers the chance to win a bunch of *Tonic Trouble* goodies and loads of Nestlé Crunch! One lucky reader will walk away with four months' supply of chocolate, a copy of the game, a *Tonic Trouble* squishy evil tomato and a keyring Ed the Janitor, while ten runners-up will get themselves a tomato and an Ed. All you have to do to be in with a chance of stuffing yourself silly with chocolate and crisped rice is answer the following question!

George Clooney was attacked in a movie by which murderous vegetables?
A: Tomatoes B: Courgettes

Mad Mario Mangler

DEAR 64 MAGAZINE,

Would anyone else out there like to string Mario up by his fat gut and fire arrows at him? Because I would. No, I'm not a deranged physcopath [sic], but an annoyed N64 fan. Who in their right mind would think "I've got the perfect character for a game, a fat Italian plumber with a gimpy brother! I know, let's make him the mascot for our machine!" Why did they do that? Sega has a superspeed hedgehog, Sony has a spinning bandicoot, and

Nintendo has... a plumber. The obvious mascot would be the superb Banjo - what could be better than a hillbilly bear who plays the banjo?

Mario is dead, long live Banjo!
Phil, no address
PS: Please enlighten me on how to spell 'physcopath'.

I think it's spelt 'Phil'.

to know is, is it about the Harrier aircraft, when is it coming out in the UK and does it look any good? I also noticed a game in the 'dates to be confirmed' list called *Airport Inc.* Is this game going to be a flight sim, does it look any good, and do you know when it will be released? Another game that caught my eye on the same page was *Top Gun*. Please inform me about this game as well. One more thing, keep

up the good work on this excellent mag!
Andrew Mintey, Swindon

Harrier 2001 is about the Harrier aircraft, a UK release date hasn't been set (though it probably won't be until next year) and based on what we've seen of it so far, it looks

very promising indeed! We have very little info on *Airport Inc* beyond the fact that it will apparently be a *Sim City*-style management sim, and *Top Gun* was announced as a title a while back but since then no further news has been heard.

Plane Crazy

DEAR 64 MAGAZINE,

As an aeroplane fanatic I like flight simulators for my console, but whenever I look at the release dates on the Gamewatch page I keep on getting disappointment after disappointment. However, when I bought issue 30 and looked in the release dates section, I saw that a game called *Harrier 2001* would be released in September, but in the United States. What I would like

Um, Quite

64's getting on down!

Yo 64 in your face! Your mag's so great I wanna kiss your face! Perhaps not then! Perhaps not now! But I know 64's gonna get it on down!

Ideas Incorporated

DEAR 64 MAGAZINE,

I am worried about the future of the game industry. Since the birth of the N64 there have been major advances in gaming, but I'm worried about how long this is going to last. Lately, it seems it's just the same people coming up with the same ideas, just in different styles. *Quake*, *Turok* and *Duke Nukem* are all the same, as well as *Mario* and *Banjo-Kazooie*. Why don't developers come up with new ideas? Are they scared they won't sell? This is not just on the N64, it's all over the console world. We seem to be starved of ideas.

What I suggest the companies do is get in new people with no previous experience or knowledge of gaming ideas. This would give

them a fresh perspective, and since new ideas need to come from somewhere (they certainly aren't coming from the developers) this seems to be the only way of doing it.

David Baulch, Nottingham

To a certain extent, developers are afraid new ideas won't sell. With games now costing millions rather than thousands to develop (the wage bill alone for a typical seven-person team over two years is a scary sum) many companies can't afford to risk spending that kind of money on an unproven concept. Instead, it's safer to take a proven success and do something similar.

The problem with getting people who know nothing about games to provide ideas is that you're likely to end up with concepts that hardcore gamers would rather gnaw off their own thumbs than play. *Myst*, anyone?

Jet Force Gemini

"Ah. Big guns..."

It's been a long time since *Zelda*, *Perfect Dark* has rolled back into the new millennium and *Donkey Kong Country* lumbers under the weight of a £60 price tag. There's a lot of pressure on the three-strong *Jet Force Gemini* team; rescuing Nintendo from its own laggard development schedules is a more daunting task than any intergalactic adventure!

So it's with considerable relief we can confirm that Rare's lowest profile release is another huge hit. This is entertainment on a grand scale, on another level to the

rest of the clone-driven, deadline-throttled gaming industry.

The plot is fairly perfunctory, with the peace-loving Union giving ground to the dictator Mizar until they too fall into the tyrant's claws. The Jet Force fleet has been trashed, just a single ship surviving with its twin crewmembers, Juno and Vela, plus ship mascot Lupus – a dog with rocket propulsion! As Mizar's forces close in, the team split up with Juno ending up on Goldwood, a jungle planet populated by peace-loving natives called Tribals. These are now being enslaved by Mizar's

The graphics are unrivalled on N64!

▲ Tiptoeing around a lava lake, blasting drones and rescuing Tribals is one of *JFG*'s easier tasks! Things get a lot tougher later on.

Jet Forces

Jet Force Gemini has a number of multiplayer games to try. Here's the lowdown...

Co-Op Mode

Two players battling through the game at once? 'Fraid not – the game merely gives player two control of Floyd the Droid. This character is essentially an on-screen gunsight, significantly reducing the processor demands. It's mildly diverting fun, but hardly stunning.

Battle Mode

A two-to-four player battle mode was inevitable, but it has to be said it's not ideal for *JFG*. The view of your target is heavily obscured, both by your character blocking your view and by extending the distance between your viewpoint and your enemies.

Target Practice Mode

Sounds dull, but is in fact a stylish homage to Namco's *Starblade*. Basically, the N64 controls your flightpath through a battleground with all four players having their own cursor to shoot Drones – and avoid shooting Tribals.

Racing Mode

Progress far enough into *JFG* and you'll get to participate in a simplistic race game, with a choice of either behind-the-car or top-down perspectives. Win the race and you then unlock a multiplayer version. *F-Zero X* it isn't, but it provides some laughs.

insect-like Drones, and the way to bonus points throughout is to rescue Tribals.

Dangerous Dreams

Jet Force Gemini originally seemed like *Banjo-Kazooie* with a sci-fi twist and, of course, big guns. But a scant few months prior to launch, the *JFG* crew were given a sharp genetic jolt, previously kiddie-style characters lurching into a premature adolescence. Vela is too oddball to be truly sexy (something about the blue hair), but she's got the shortest skirt in videogaming history and the 'big guns' crack is now something of a double entendre. Juno is still a little young to be a starship captain, but he's a much more realistic and imposing figure than before. As you can see from the screenshots, the detailing on the characters is fantastic and animation is generally impressive (cartoon jumps aside). Lupus, the mascot dog, is perhaps the best animated of all, putting on a superb display of scratching whenever he gets bored.

▲ Juno's ship swoops down onto Rith Essa, a deserted mining colony, in one of *Jet Force Gemini*'s numerous cut-scenes.

As for the enemies, the insectoid Drones are oddly menacing for cartoon-style characters. They aren't the ghoulish freakoids of *Quake* mythology, but there's a genuine intelligence in their movements which makes their compound-black eyes quite spooky. And later on, happenstance transforms them into some really nightmarish monsters. Whatever their shape, heavy firepower rips characters apart in a most satisfying spray of bodyparts and blood. Even better, the cutesy Tribals are eminently shootable – which is both good for a laugh, and ups the challenge when you're going for records, as a casual shot can be completely disastrous!

FMV Flicks

The game's graphic engine is unrivalled on N64, particularly when handling numerous FMV sequences which are so brilliantly composed as to rival even *Final Fantasy*'s mighty CD-streamed, pre-rendered epics. *JFG* is an adventure that truly comes alive with its characters. The opening FMV is breathtaking, but cut-scenes run throughout the game filling in various pieces of backstory. The storytelling is beautifully done with a uniquely British, very Rare sly humour – a revered priest is flattened by a rocket, a trio of Tribals are lined up before a firing squad! Sony has made big claims for PlayStation 2's 'emotion chip', but all the best Nintendo

the future is DVD

Do you want to know more? yes

software is built around emotion and this is a game which really involves the player. Rare's 3-D skills are perfectly matched on the audio front; besides a cacophonous set of gunfire sound FX, there's some fantastically cinematic music. One alien planet enjoys a soundtrack which sounds a near cousin to the eerie chimes *Star Trek* movies use for their very spookiest moments!

Arcade Annihilation

So. We've got a great cast, amazing cinematics and wonderful sound. What about the game itself? Well, of course, there's the guns...

Warfare is about two things, fighting and manoeuvring. Whereas *Goldeneye* was, at root, all about combat as best typified by the excellent sniper rifle, *Jet Force Gemini* is all about mobility. For *Goldeneye* addicts, the temptation will be to hold down the R button for first-

person perspective, picking off enemies with 007 precision. However, doing this is slow and freezes the player's position – far smarter, and more fun, to charge in and let the auto-aim tackle the insects on the run. There are, of course, moments where you need precise fire – your weapons include a sniper rifle, and enemies on high positions will need to be picked off – but this is a much more arcade-style experience. If *Goldeneye* was about a

Foxy Firepower

Jet Force Pistol

Reasonably accurate, but rapid-fire eight shots and it'll overheat and lock up for a few seconds before it can be used again.

Machine Gun

Inaccurate and can blow up if overused, but hugely lethal at short range. Eats ammo like a fat bloke eats pies.

Plasma Shotgun

Holding down the trigger button builds up the lethality charge, just like *R-Type*. Handy for wasting the tougher enemies.

Homing Missile Launcher

Exactly what it says on the tin, with the bonus of a very cool targeting cursor.

Tri Rocket Launcher

Does, indeed, fire three missiles at a time and they're all loaded with mega-TNT.

Sniper Rifle

The *Goldeneye* weapon of choice, complete with zooming sniper scope. Not something that can be used on the run, though.

Flamethrower

Short range, but very destructive! The main problem is keeping it stocked with fuel, as it runs out very quickly.

Shocker

Fry that sucker! Delivers a lethal electric shock, which really makes Lupus yelp in multiplayer Battle mode. Great fun!

Grenades

Excellent when taking out Drones with shields. You need to conserve them as they're quite rare (no pun intended).

Shuriken

Razor-edged throwing stars with a homing mechanism! The truly sadistic can slice off the heads of Drones – or Tribals!

Remote Mines

Press fire once to deploy, then wait for a Drone to appear and press fire again to detonate. Instant limb separatage!

Proximity Mines

Once deployed, it's wise to stay away – these spiky little devils detonate when they detect movement nearby.

Cluster Bombs

A grenade which splits into lots of little sub-bomblets for massive destruction. Ideal for pure slaughter.

Flares

Not really a weapon, just a way of lighting up the dark passages when you don't want to waste any ammo.

9mm silenced round drilled through the temple at a hundred paces, *JFG* is about plasma shotguns and Tri Rocket Launchers at point-blank range; the biggest danger is blowing yourself up!

By any conventional, realistic standards you'd need to train for

Nuclear-scale tactical fireplay!

aeons to master this hardware. Fortunately, Rare takes an arcade approach, providing an abundance of energy and continues so that you can stumble through the nuclear-scale tactical fireplay and still progress to new levels. The sheer outrageousness of the firepower means there has to be more to the game, and there certainly is, with numerous puzzles, sub-games and quests.

▼ Even the Character Selection screen is a work of art and comes complete with humorous bio-scan feature.

But let's begin with the firepower. The opening levels, much like *Banjo*, are basic training and the emphasis is on reaching level's end with all enemies dead. Many of *JFG*'s doors are 'life force doors' – meaning you have to kill everything for them to open. To underline the arcade mentality, exiting these levels brings up a host of stats on enemies killed, Tribals rescued, time taken and so on. The idea is that there's always more to do – even when backtracking the challenge is still there.

Rocketship Rage

As you progress through these levels, observant players will keep stumbling

on new weapons chests, thereby gaining a huge range of firepower. As you can see from the boxout, it's not just a case of bigger bullets – each weapon has its own way of working. Moreover, some weapons also serve to unlock hidden areas by simply blasting away pieces of scenery.

Once equipped with a reasonable set of firepower, you'll notice the game opening up. You get to jump off planet – there are no fewer than nine distinctly different environments including Mizar's Palace, the Battleship Sekhment and the once tranquil forest planet, Goldwood. The SS Anubis is a capacious cargo ship, and it's here that you're reunited with

▲ Despite the cartoony style, the way bugs splatter apart in a shower of blood and body parts is highly satisfying!

Vela. At this point the game branches, with two separate adventures in play. You can switch between characters at will, but their missions are different even though they can visit the same areas. Their different skills – such as the blue-haired Vela being able to dive

deeper than other characters – mean there's plenty of backtracking, opening new areas in previously explored levels. The game branches yet again when you find Lupus, the flying dog, and the ultimate objective is to

bring all the characters together at Mizar's palace for what will be an epic final confrontation.

This would be more than enough for most games, but there are also specific missions which can be uncovered. For example, on one of the early levels Lupus can activate a Floyd mission,

which has the droid flying through tunnels at *Wipeout* speed, collecting fuel cells and blasting enemy forces. And there are no fewer than three multiplayer games, plus a final secret mission if you finish the game.

Of course, there are those who will complete the game in a few short days of manic gameplay, but there's so much to this game, so many secrets to pull you back in, so much enjoyment along the way that it trashes anything yet seen on CD. That said, *JFG* is still, at one level, something of a kludge. It lacks the precision engineered platforming engine of *Banjo-Kazooie* or the elegant stealth system from *Goldeneye*. However, it's still simply riotous entertainment and a breathtaking arcade blast which makes the N64 essential. ■

2nd opinion

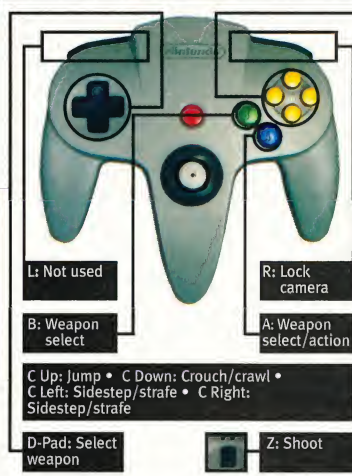

Spectacular visuals. Excellent music. Awesome weapons. Massive challenge. But... Unlike other Rare games like *Goldeneye* or *Banjo-Kazooie*, which were so addictive and involving that the real world faded away during play, with *Jet Force Gemini* I was always aware that I was just sitting in front of a television playing a videogame. The all-important hook that makes a game compulsive just didn't seem to be there. The bus-sized turning circles of the characters, occasional slowdown and irritating camera didn't help. Yes, it's still a good game, but measured against Rare's previous classics it falls a bit short.

Turok: Rage Wars

Is this the ultimate add-on to the ultimate dino hunting game? You bet your life it is!

Sequels. Love them, hate them or remain indifferent, they are an integral part of today's media. Imagine where we'd be without them. We'd never know that old asthma chops was Luke's daddy, we'd never know how *Goldeneye* could possibly be bettered, but more importantly than that, we'd never have as much fun. *Turok: Rage Wars* isn't a sequel though, it's

A Deadly Friend!

If you find yourself seriously outnumbered or cornered in a bad situation, try tinkering around with this little devil! It's a cunning piece of kit. First you throw it at a wall, then it embeds itself into the concrete and monitors the surroundings. If a daft enemy comes ambling towards it, it will then unleash a volley of deadly bullets that rip through everything. They don't come along very often but when they do the result is gore by the bucketload! Yummy!

▲ This is where it all starts! Choose your weapon carefully, because once you're out there in the arena there's no turning back!

► If you target someone then make sure you blast them with all your might. If you don't, you could end up in some serious mess!

The multiplayer modes are stunning!

disposition with fewer friends than Mr Bean, remind them that they can enjoy a four-player deathmatch on their own, and hey presto, you have cold hard cash being delivered straight to your door.

To some extent it is. The deathmatches are all there, but they have been lovingly improved upon. Firstly, the game engine has been cranked up until you could almost imagine a dodgy Scottish accent shouting, "She cannae take it, Captain!" somewhere in the distance. The speed of play is notably smoother than *Turok 2*, with the cameras literally pirouetting around corners. The speed of opponents is frighteningly fast too, with raptors and guardians lunging towards you at an almost skin-shuddering velocity and it soon becomes a test of nerve whether you are able to handle the pressure.

The single-player option in *Rage Wars* wasn't a totally necessary touch, but it adds a further depth to the game and even allows you to

▲ If you are a particularly good shot (like us lot) then when you complete a level successfully you'll be awarded a present. Ooo, an eagle talisman!

something far more interesting than that. It's as if the best bits of *Turok 2: Seeds Of Evil* have been lovingly pruned, dipped in industrial strength rooting powder and allowed to grow into some enormous carnivorous monster. This is the pure essence of gameplay.

Cerebral Bore

Initially *Turok: Rage Wars* appears to be nothing other than frag tags and deathmatches bundled onto a cart for those four-player fanatics who sadly lack the comfort of human contact. If you were really sly, you could suggest that it was a shameless cash in. Simply throw together the old game, aim it towards those of an antisocial

Oi! Fat Bloke!

This has got to be one the most insane, and cruel, weapons to be included in *Rage Wars*. It goes by the name of the Inflator, and to quote a well-known varnish advert, it does exactly what it says on the tin!

Step One

Firstly, select your fat, juicy, plump victim. Take aim with your patented Inflator then carefully squeeze the ergonomic trigger. Gently now, we don't want to miss and hit a friend, do we?

Step Two

The juicy victim will now begin to grow. Follow the poor devil and keep firing that red laser up its bum. Eventually it will become so big it could appear of *Killroy* complaining of Fatism.

Step Three

The lumbering hulk is quite literally about to pop. You could finish it off by hitting it with the Inflator again, or you could swap to another weapon, take aim and... well, you can imagine the rest can't you?

experience some kind of storyline, which is a bonus! We ask for blood, guts and guns and we get blood, guts, guns and storylines. Why, thank you! Choosing from one of four characters from *Turok 2* to start with, you then enter a quest of destruction. Slaughtering your way through varying

scenarios, the single-player mode allows you to hone those all-important skills of butchery and barbarism which come in extremely handy later on. They aren't what make this game, though. Admittedly, it is fun knowing you are given challenges where you only have one life and have to fight your way out of a raptor pit, but where *Turok: Rage Wars* bursts into fruition is the multiplayer modes. These, ladies and gentlemen, are stunning.

Scorpion Launcher

First, the two-player modes. Imagine what you would like to be able to do

during two-player games. Go on, think about it. What would you really like to happen? Would you like to stalk each other through a silent trap-filled maze? Would you like to go co-op and frantically try to fend off hordes of compies, mutants and deformed insectoid maniacs? Yes? Well, your wish is *Turok's* command. It goes one better though, delivering some truly innovative surprises and in doing so it also proves itself to be much more than a shoddy cash-in on *Turok 2's* success. You can go raptor hunting, where you desperately try to escape through a waterlogged facility while the dastardly dinosaurs

Four Play!

There are four modes of play for the four-player games and each of them is slightly different. Here they are in the definitive, if somewhat blood soaked, guide!

Gauntlet Mode

This is your basic slaughterfest. You choose your character, allow the CPU to choose the battle arena, then go all out to kill as many of your friends in the time as possible. It's wholly gratifying, extremely bloody and a right old laugh. It resembles *Turok 2's* deathmatches more than the others do, but it's still a lot of fun!

Flag Mode

Capture the flag! The first one back to their area with the flag wins! It's a bit like paintballing, but without the mess. It also gives you an adrenaline rush the moment you see that flag and go running for it. It's definitely more fun to be the hunter though!

Team Mode

Choose between four teams (Coyote, Snake, Bear or Wolf) then enter the arena. People on your team will not fire at you and you can work in conjunction with them to wipe out everyone else. As with everything else in *Rage Wars* though, they are fully alterable. You can have friends trying to kill you if you please and if you feel really daring, you can go head to head with three enemies all on the same team! This is for maniacs only, though!

Frag Tag Mode

You're it! This is basically a sanitised version of fox hunting. One poor soul will be the hunted, the others will go out hunting! You can transform into all sorts of animals, including monkeys and chickens, and you are armed with nothing but your wits. Luckily, if you touch a transporter you can turn your rivals into chickens so they become hunted instead. Gory!

▲ You know they've had it when they gradually begin to fall backwards. Another shot will send him on his way nicely!

▲ If you hit someone hard enough from underneath then they'll actually come flying off their feet. What a dangerous place this is!

swim after you a la *Alien Resurrection*. You can enter an arena almost unarmed and strategically place sentry guns everywhere in the hope your foe ambles past looking for you. You name it, and you can probably do it. Not even in the two-player mode does *Rage Wars* fully come to life though – it is when you can sit down with three other buddies... and blast the living crap out of each other.

Four Way Missile

There are four modes of play with four players, but this doesn't just limit you to four rigid set scenarios. In these separate sections you are able to alter almost every aspect of play to suit your needs. You can dictate which players side with you or would rather take your brains out with a warhammer, you can alter their skill and aggression meaning you could always have the upper hand if you're a softy, but best of all, you can do it without the normally prerequisite three mates.

Selecting a single-player/multiplayer game (now there's a paradox!), you can define exactly what you want to encounter. The virtual enemies are known as 'bots' and can be as stupid or as Einstein-like as you want. The AI is

tremendous, especially as you crank up the difficulty. They will backtrack down alleys or disappear around a bend, only to ambush you or release a volley of unstoppable shots just at that crucial moment. If you thought single-player deathmatches were going to be a breeze then think again – this can get as hard as any gathering of thumb-fatigued *Goldeneye* veterans.

Plasma Rifle

As far as criticism goes, there can only be one major grudge, but even then it holds no bearing on the four-player action. The single-player Quest mode is slightly too steep when it comes to a learning curve (imaging trying to push a Morris Minor up a cliff and you'll have some idea). The first boss, of which there are many, is coated in invincibility goo. Nice idea, but he's a swine to kill. However, persevere at it and you soon begin to realise that the game is allowing you to learn.

You quickly become deft at reading situations and learning what the game can throw at you, and before long you begin to memorise structures and

arenas which you will later traverse in frag tags and deathmatches. In fact, the whole single-player option acts as one big training ground for the true meat. After all, the primary reason for *Rage Wars* to exist is its ability to give the lone player that multiplayer feel, and it does that in abundance.

Stop That Monkey!

As with *Turok 2*, you can become an unfortunate primate and be hunted through a series of deadly arenas. You can also become a chicken, which is very bizarre. If this were *South Park* you'd be able to fire eggs out of your ass!

A bloodbath of major proportions!

\$64,000 Question

- ⊕ Smooth as a babies bum
- ⊕ Faster than before
- ⊕ Loads of arenas
- ⊕ Free reign over options
- ⊕ New weapons
- ⊕ One-man multiplayer action!
- ⊕ Same engine, just spruced up

▲ Being a hard bunch of chaps, who will give in first? Will it be the hard-looking insect with the gun or... the hard-looking insect with the gun?

Firestorm Cannon

Graphically, nothing much has changed from *Turok*'s last incarnation. The drones and firebombs are all just as we fondly remember them, and they still have that vacant 'please shoot me in the head with your Tek Bow' expression. Wonderful! Thankfully, the arenas have been designed in such a way that the hindrance of *Turok 2*, the fog, has been eliminated entirely. You can see for miles around a killing field and pop people off even before they know what has hit them. Again, this adds to the urgency and frenetic action of play that just keeps on building.

It all looks blisteringly good in hi-res with the help of an Expansion Pak, and although still maintaining the fuzzy, slightly out of focus look of almost every N64 game you'd be hard pushed to find such a satisfying killing spree this side of *Goldeneye*. That isn't to say it is the new *Goldeneye*, though. It still lacks that certain quality that set the Bond bonanza so far ahead of its contemporaries. The perfect, crisp arenas, the almost architectural layout with which the playing areas were designed all elude *Rage Wars* to some extent, but it makes up for any shortcomings with its sheer assault on the senses. The pick 'n' mix variety and combination of weapons, the vast labyrinth of arenas, the multitude of

SOS!

Some may have difficulty tackling the first boss, so here's a quick guide to placing him six feet under. Notice that he has a translucent gloom around him. This is his shield and needs to be taken down before any damage can be done. Snipe him from a distance, keeping him away from any health power-ups. Once his shield is down, he will momentarily fall to the ground. This is your only chance to kill him so go in fast, clobber him about the head a bit, then run before he has chance to get up. Keep doing this until he finally dies.

bots that can be maimed for your enjoyment... all these aspects give *Turok: Rage Wars* a distinctly different feeling from *Seeds Of Evil*. This isn't a cash-in, this is a bloodbath of major proportions!

Sunfire Pod

If you already own a gore-dripping copy of *Turok 2*, then you should already be familiar with the death-bringing expected of you. You can rest assured that with *Rage Wars* comes an even greater chance to unleash that anger. It doesn't pretend to hold a Shakespearean plot, nor does it pretend to be the next big thing in gaming. All it does, plain and simply, is entertain. It gives you blood, unadulterated slaughter and a rollicking good time to boot and for that it should be praised. Expect nothing like an alternative to *Goldeneye* and don't expect a serious contender to *Perfect Dark*'s imminent succession to the throne, but do expect the best thing in between. This, guys and gals, is the perfect stopgap to keep those bloodthirsty embers burning. What a corker! ■

Rayman 2 is the second in what you could call Ubi Soft's 'limbless heroes' series of 3-D adventure games. We say that because both *Rayman 2* and the previous Ubi Soft title *Tonic Trouble* feature main characters with one thing in common – while they have bodies, hands and feet

they don't actually have anything connecting the former to the latter.

Now you might argue that this is wholly a stylistic thing and the characters are deliberately designed like that to give them a distinctive look, but we're fairly sure the real reason is that it gives the animators less work. Whatever

the motive though, it doesn't matter, because *Rayman 2* is, quite simply, a graphical masterpiece!

Shining Brightly

The storyline behind the game goes something like this: having successfully concluded his last adventure (the tale was related on a lesser console so it's not that important), Rayman has returned to his home planet only to find that a band of dastardly intergalactic pirates – are there any other kind? – have popped in for a visit and are busy enslaving the populace. Unfortunately Rayman only discovers this when the pirates capture him and throw him into a cell on their ship, so that is where the game begins.

Quite simply a graphical masterpiece!

▲ There are loads of really nice little graphical details in the game, like these ripples when Rayman runs through shallow water.

Beam Me Up, Teensie!

Everything in the game is based around a hub world. To reach the hub from within a level you first need to free one of the trapped teensies, who then opens a portal with a little impromptu Russian dancing (well, it beats just waving a wand and shouting "Abracadabra!"). Once the portal is active, Rayman is sucked through.

The first task is to escape – once that's accomplished, Rayman must then track down his various friends in order to find out exactly what has happened since he's been away, and from there work out how he's going to go about setting things right. It transpires that the pirates have shattered the magical core of the planet which supplies everything with life energy, so Rayman must find and collect all the pieces to restore order. In addition, to defeat the pirates Rayman must first wake a chap called Polokus, and for this he needs to recover four masks which have been hidden at various secret locations. It goes without saying then that he's got his work cut out for him!

Escaping from the cell is fairly easy. It leads to a slippery slide down a chute,

at which point Rayman then enters the first level. This area is basically the first training section where we learn about Rayman's initial powers (he gains more as the game progresses) and also find out about the most important items in the game... the lums.

Cor, Lumme!

Lums are strange glowing lumps of energy with little wings (no, they're not related to Navi). The yellow ones are the shattered pieces of the planet core and you need to find them all in order to complete the game. Red lums give you more energy, blue lums give you air when you're underwater and purple circular lums can be used to swing from place to place, Tarzan-style. You need to use all the lums in conjunction with Rayman's various abilities in order to complete the game. In addition to this, there are other incentives for doing well. While you don't need to collect all the lums to complete a level, if you do manage to collect all of the yellow ones then you get access to a special bonus stage. The bonus stages generally consist of various races, which require you to almost destroy both your joypad and your fingers in order to complete them, but they're fun all the same.

First Impressions Last!

From the moment you turn on your N64 with the *Rayman 2* cartridge in it you know that you're in for a treat.

▲ The hub is actually a mysterious river and you reach each different level by diving into it at various points.

\$64,000 Question

- ⊕ The most gorgeous graphics of any N64 game so far!
- ⊕ The best animation of any N64 game so far!
- ⊕ Character handling: see previous point!
- ⊕ Difficulty level judged just right
- ⊕ A range of different sub-games provide variety
- ⊕ Central character is excellent!
- ⊖ Um... it's not *Perfect Dark*?

Basketball Bodypopping!

If you leave Rayman unattended for any length of time without pausing the game then he'll get bored and start playing basketball – with his own body! If that's not weird... well, we don't know what is!

Give Them Liberty... Or Don't!

Every level has a number of cages scattered around inside which the pirates have imprisoned lums. You need to blast the cages to set the poor little fellows free.

WE WANT OUR DADDY!

A highly addictive adventure game!

Graphically the game could almost be mistaken for a PC title – the visuals are that impressive. Even more impressive is the speed at which the game moves and the smoothness of the animation. When you see Rayman hopping about you pretty much expect at least a bit of lag in the controls because surely something which looks so nice can't

respond perfectly too? But it does. Control over Rayman is absolute, as he runs, jumps, rolls, flies, hangs and otherwise makes his way around the

Murphy's Law

The tiny fellow with the huge grin is a Murphy. He pops up at various points throughout the game and gives Rayman handy hints to get him through tricky tasks or to help him learn about new powers. In the preview version he was a little rude and used to call Rayman 'Big Nose' but this has been changed – presumably Ubi Soft didn't want to risk offending any gamers with prominent hooters!

HI, RAYMAN! GLAD TO SEE THAT YOU ESCAPED!

I'M MURPHY, AND I'M HERE TO BE YOUR GUIDE.

SWIMMING NOT ADVISED.

▲ While Rayman can swim, some water is dangerous either because it's polluted or because some rather nasty fish inhabit it.

▲ Rayman's ears (at least they look like ears) can be used in a similar way to rotor blades in order to fly for short distances.

Escape To Victory!

The first thing you need to do is escape from the pirate ship and this is fairly simple (which is good, since until you've done this you can't do anything else). After a slippery slide down a chute inside the craft, Rayman finds himself on a ledge outside the ship trying to work out how he's going to get down to the ground... until Globox solves the problem for him and they both take the quick way down!

incredibly detailed levels of the game. In fact, you could hardly make him move any better if your brain were wired up directly to the N64!

Rayman 2 is a joy to play!

Usually, where 3-D adventures fall down is on the camera and the gameplay. The latter often just consists of wandering around areas pressing switches and killing bad guys, while the former (if badly implemented) can mean that the latter becomes not just boring but boring and irritating at the

► Swimming is always a bit of a nightmare in 3-D games but it's handled fairly well in this one. Couldn't be simpler in fact!

▼ In this section a pirate runs about like a nutter on the platforms ahead of Rayman and lobs exploding rocks at him.

A Gleaming Masterpiece!

Rayman 2 though appears to have avoided these problems. The camera is

same time. Not the ideal recipe for enjoyment.

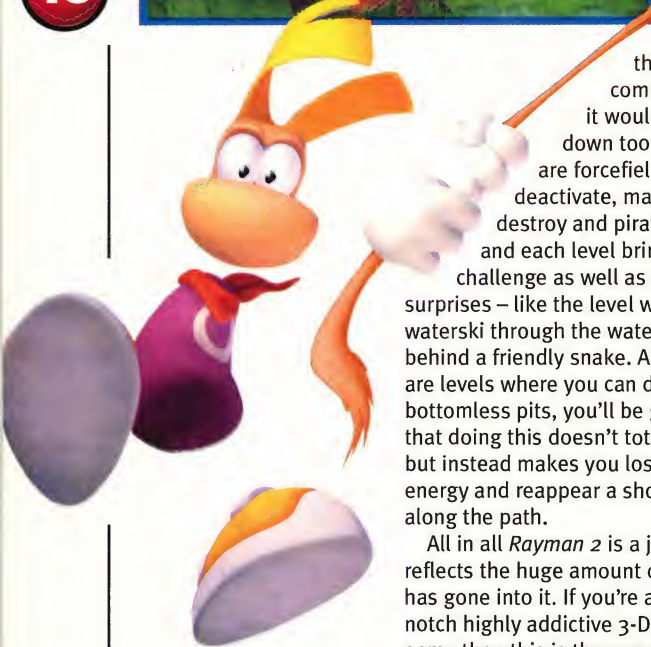

extremely intelligent, zooming in and panning out where appropriate to give you the best view of proceedings. On the odd occasion where the camera doesn't give a perfect shot of things, the camera buttons make fixing the view very simple. And most importantly, the camera never results in an untimely death – the most you are likely to suffer is a second or so of disorientation.

The puzzles in the game are varied but not too complex because Rayman 2 is a very pacy game, and if you made

Interlude...

At various points in the game the scene shifts to the pirate ship where FMV-style cut-scenes move the plot along. Here the pirate captain orders his sailors to send the ship after Rayman...

things too complicated then it would slow things down too much. There are forcefields to deactivate, machines to destroy and pirates to sort out and each level brings a new challenge as well as a few surprises – like the level where you waterski through the waters of a swamp behind a friendly snake. Although there are levels where you can drop down bottomless pits, you'll be glad to know that doing this doesn't totally kill you, but instead makes you lose a little bit of energy and reappear a short way back along the path.

All in all *Rayman 2* is a joy to play and reflects the huge amount of work which has gone into it. If you're after a top-notch highly addictive 3-D adventure game then this is the one to go for. With games like this on offer, Rare has got a serious rival for the title of N64 3-D adventure game supremo! ■

► Rayman can climb up narrow shafts by repeatedly jumping and wedging himself in-between the walls.

▲ Globox is a large blue bloke that helps Rayman to escape from the pirates. Unfortunately, when he doesn't come back his kids aren't too happy!

He Swings Both Ways!

Once you've met Ly you get the power of... erm, swinging. This means that if you fire an energy bolt at a circular lum it turns into a rope and lets you swing across gaps. Tarzan, eat your heart out!

Strange. Weird. Twisted. These are words that describe a number of things, including many of the 64 MAGAZINE team (or at least one of them). But believe us, they don't even scratch the surface when it comes to talking about *Earthworm Jim 3D*. We haven't seen anything quite so mad since... well, since the last really mad thing we saw. You'd better brace yourself, because heeeeeere's Jimmy...

It's been a long time in the making but finally *Earthworm Jim 3D* has made

it to the N64. Now, we know what you're all thinking – it looks like virtually every other 3-D Mario-esque adventure game that has ever existed. But wait! Underneath the rather spanking gorgeous visuals lies possibly one of the funniest, cleverest games that we've played in quite a long time. Honest, guv.

Tell Us A Story

The basic storyline is rather contrived and unbelievable, but then we've come to expect that from a character who gets squashed by a flying cow every time we see him. After his most recent 'plummeting bovine' incident, Jim has taken a turn for the worst and lost his marbles – literally. With his body lying unconscious in a hospital bed it's up to Jim's ego to venture inside that tiny mind of his and gather up all the marbles

One of the funniest, cleverest games in a long time!

before everyone's favourite worm becomes a vegetable for life! Weird is not the word here, folks...

▲ 'Fridges Launched'? Why? Well, as you make your way through the game, you'll soon find out what they do!

▲ Explore the central brain level and you can take a look into the outside world. Look – it's Peter Puppy! Hi Peter!

When you break it down what you've got here is a game very much like *Banjo* or *Mario* – consisting as it does of one central 'hub' level, set inside Jim's brain, with four main areas branching out of it, each leading to various parts of his

subconscious. Of course, making your way into each area isn't simply a matter of using the door; to get inside you need a set number of Golden Udders from the levels

(no, we don't really know why either but it's something to do with the Sacred Cow of Contemplation). Once you've got the required number you're free to drop in and explore...

Marble Season

The Udders aren't the only stumbling block you've got to overcome to make progress in Jim's head. Access to each of the levels in the different areas of the game is only granted once you've restored some of Jim's sanity, as measured by how clever he is. By collecting the various marbles scattered around each level your intelligence

improves – you're as smart as pond scum to begin with, rising up to such heights as a Fur-Covered Trout, your cousin Billy or even Sher's Plastic Sturgeon (we noticed the joke too) as you go. Again, bizarre doesn't even come close.

Each of the levels has a separate theme dependent on the part of Jim's brain it resides in. Visit his Memory and you're taken back to the great 'Chicken Wars' when the farm was under siege from the cows, while a trip into Jim's Happiness finds his favourite fried foods overrun by an evil alien chef! With titles such as 'Barn To Be Wild', 'Poultrygeist'

The Worm That Turned

The world of *Earthworm Jim* is filled with weird and wacky creatures all waiting to be saved – or blown away! Get to know your friends and foes – you'll be thanking us in the long run...

The Sacred Cow Of Contemplation (The Guide)

Leading our heroic worm through his subconscious is the holiest figure in the mind of Jim, the Sacred Cow. Offer the Golden Udders to him and appease his desires... oh, and maybe save Jim's brain into the bargain!

Jim (The Hero)

There's only one ego for this job... and it's a really big one! Once just a regular earthworm, Jim was transformed after a robotic super-suit landed on him. This time though, he's not saving the world – he's saving his marbles!

Peter Puppy (The Friend)

He's not just a normal puppy, you know. Possessed by an evil dog spirit, the slightest hint of fear changes Peter into a slavering beast intent on only one thing – beating up Jim! Thankfully, tickling him turns him back into worm's best friend...

Snott (The Bogey)

If you ever need a helpful piece of advice or a tip on how to get through a tricky area, Snott's the guy to talk to. Always on hand in a sticky (sorry) situation, he pops up when there's a new ability to be learned. Make sure you pay attention to his advice!

Psycrowe, Fatty Roswell and Professor Monkey-For-A-Head (The Villains)

As you'd guess, there's something sinister lurking behind Jim's cranial failure... and these guys are it! You need to fight your way past them if you want to have any chance of bringing Jim back!

Pork Boarding!

If there's one thing you'd never expect to see in any videogame, it's a worm in a robotic suit surfing on a pig. Still, this is *Earthworm Jim* so anything's possible! Once you've finally collected enough marbles to open the relevant doors you get the chance to face the evil nasty controlling that portion of Jim's brain. Whether it's the psychotic Psychrowe or the deranged Professor Monkey-For-A-Head the object is the same – race around on your pig collecting Blue Marbles! Strange but true, this proves to be one of the toughest parts of the game... especially on later levels!

and 'Lord Of The Fries' you can guess that there's a whole host of warped puns waiting for you.

Milky, Milky

The fact that there's such diversity in the levels makes for an interesting (and hilarious) game. There's no set design

variety here too which shows in the various puzzles throughout the stages.

Getting each of the Golden Udders requires a number of different tasks to be solved on each level. Most of the time it involves trying to solve the problems of a particular character and getting them what they want – a

Sometimes shocking, always hilarious!

to what you're going to face next simply because the whole thing is so darn weird – one minute you'll be fighting beefy bull guards and the next there'll be an army of evil ghost chickens! There's plenty of

Rastafarian corpse in desperate need of his prized disco-dancing medal, a chicken short of his underpants and the King Gherkin trapped in a vice are just a few examples of such craziness. The best part though is the fact that you have to do something different each time to solve each puzzle; for example, once you've released Elvis (!) from his prison cell you need to shoot the

► Thank you very much! It's Elvis and he's been doing the Jailhouse Rock! You'd better let him out before he gets tenderised!

▲ Catching the Ninja Mouse inside Professor Monkey-For-A-Head's haunted mansion is a really tough job... even for total experts like us!

▲ To make it up the tall shaft here, use of Jim's patented Rocket Fuel is required. Just don't breathe in the fumes afterwards!

▲ Ricochet your bullets off the frying pans and when they've all been hit, the door will open for you. Ingenious!

Up The Arsenal

When the adventure begins, Jim finds he has only a few items with which to defend himself. You can either blast the enemies with your trusty plasma gun or lash them to death by using your head as a whip! As the levels progress, you come across special weapons dispensers that let you grab a limited supply of ammunition for a wide variety of amazing guns. Try out the 'Explosive Banana' for a spot of demolition, the 'Apollo 13' with its lunar capabilities or even the brutal 'Cleaver Launcher' to take care of those pesky bovine enemies!

▼ Ghost chickens! Argh – run away! Give them a quick smack with your worm whip before they try to peck your eyes out!

guards blocking his way and whip him on the bottom to make him jump over any dangerous gaps in the floor! Laugh? We nearly had an accident...

Shock, Horror!

To be blunt this game really surprised us. We were expecting a relatively average platform romp and instead were presented with something we'd

happily take to meet our parents at the weekend. Okay, so we admit that there was the occasional moment when we felt like smashing the cartridge to pieces – Jim's viewpoint can make jumping or finding places to go tricky, and constantly being blown to bits by the rather difficult bosses can be, to say the least, annoying. But please don't let that stop you from giving it a go. If you don't play this, you'll end up missing out on a sometimes shocking, always hilarious adventure that will keep you going for quite a while. And in that case more fool you, that's what we say. ■

▲ The killer vacuum cleaner can be a pain but if you feed him a couple of 'Exploding Bananas' it might just shut him up...

2nd opinion

If bad puns and manic action are your wont then look no further – perfection is here! *Earthworm Jim 3D* is a superbly enjoyable platform romp which keeps the jokes coming thick and fast and never ceases to amuse. Watch out for those falling cows! **ROY KIMBER**

Evil demons squatting in your sacred cathedral? Forget the bailiffs, mate - it's time to call in someone a bit tougher...

Gauntlet Legends

Okay, hands up those of you who remember the original *Gauntlet* games in the arcade? If you do,

I Am The Dungeon Master

As you'd expect from any game filled with more mythical demons and magic than Paul Daniels' underpants, there are plenty of warriors on offer ready to fight for the cause. Whether you prefer to run in waving your axe like a maniac or stand back and turn all of your enemies into toads, we've got the blokes (and birds) for the job. Pick wisely though because once the journey is underway, you won't have a chance to change your mind!

then officially consider yourself 'old'. Having three mates crowded around a tiny machine with you, drawing straws to decide who had to play on the outside (because it was so awkward) and then stealing all the food for yourself while letting Death kill everybody else... ah, those were the days. Still, time must move on and so must games, but that doesn't mean you can't go back to your roots...

As past examples will prove, updating a classic retro game means only one thing - some bright spark decides to make *exactly* the same game but in 3-D.

▲ The grass is greener (and the monsters nastier) on the other side of the fence. Blast them while they can't get you - ha!

It's been done dozens of times to titles such as *Bomberman*, *Super Mario* and other quality retro classics. *Gauntlet Legends* sits comfortably between titles such as these because while *Bomberman 64* sucked and *Super Mario 64* rocked, this new offering is simply 'quite nice'.

First things first - if you hate the whole *Dungeons & Dragons* concept, this is *not* the game for you. Basically, there's someone rather nasty living in your mate's cathedral and it's up to you (and three friends, if you've got any) to go and kick him out for not paying his rent. Or something.

Death

In a nutshell, this is *Gauntlet* as it was all those years ago but with fancy graphics. The idea is still the same - collect keys, open chests, grab food and blast all of the monsters that come pouring out of the 'generators' until you seal them shut. For those of you that loved it then, you'll still love it now. As for the rest of you... well, surprisingly it's actually quite a good laugh. Many of the

▲ The magic potions can really have a major effect on the monsters around you - just don't waste them all at once!

▲ Apparently, touching Summer's sacred pillars bring back his power. Yes, we're sure he says that to all the ladies...

A tasty slice of retro pie!

old touches here will go straight over your heads (right down to the booming voice announcing that the 'yellow wizard is about to die') but as brainless killing games go, this is pretty good.

It's not all mindless violence though – to solve all the puzzles and ultimately find all the secrets such as hidden characters and special weapons, you need to think quite a bit. Most of the time, the puzzles involve pressing a button (usually hidden under a rock) and working out what has opened up before doing it again on the next uncovered switch. It might sound a bit dull but when you finally get something rewarding, it's all quite satisfying.

Orcs A Lawdy

Of course, there are flaws. The same problems of having to all think as one still exist – the screen doesn't move on if

you're all trying to go in different directions – but with the added 3-D, the amount of surrounding area is even less than it was before. The same can be said about the number of monsters; there just aren't enough of them (and anyone who has had the experience of 50 ghosts all rushing towards you at once as in the original will agree). The main problem though is that it can all get a little bit repetitive. Standing in the same spot trying to fend off wave after wave of identical monsters isn't

exactly an inspired gaming moment by our standards.

But then, is it really supposed to be? This is possibly the simplest of gaming concepts resurrected for the 'younger generation' to enjoy and it does it pretty darn well. Certainly consider trying it before you buy but if you're looking for a tasty slice of retro pie, they don't come much sweeter than this. ■

▲ These golem creatures really take a beating. Don't just stand there, Falconess – run away like brave Sir Robin!

This is definitely one of the games I've been anticipating the most, and at the end of the day it's not half bad. The 3-D works well, although the old top-down view is still preferable, but with the extra characters, new monsters and hectic gameplay it's worth a look! **ROY KIMBER**

Knockout Kings

Let's get ready to rumble! Oh hang on, that's a different game...

Boxing games in the past by and large haven't really been that much cop (except maybe for *Super Punch-Out*), so it's fair to say that *Knockout Kings* didn't arrive in the office to much of an enthusiastic welcome. However we're extremely

glad it did turn up, because when we started playing we were hooked!

It's hard to say exactly what it is that lifts *Knockout Kings* above the dire attempts at boxing games that we've seen in the past – it might be the responsive controls, the realistically solid boxers, the custom facility, the sterling audio or simply that it's such damn good fun! Whatever the reason though, EA Sports has definitely got a winner on its hands this time around.

Knockout Kings contains 25 officially licensed boxers, including a mixture of current and past greats. Muhammad Ali is undoubtedly the most well-known, but boxers such as Lennox Lewis and Evander "The Real Deal"

▲ Ali wins by a knockout in round two – it's true you know, he really is the greatest! (Even if he's about 300 years old.)

Holyfield should also be recognisable to even the most uninformed about boxing. If you *are* a boxing fan then you'll doubtless recognise all of the bruisers on display, but here at 64 MAGAZINE we're not, so we didn't.

Let's Get It On!
There are a number of different modes to choose from in *Knockout Kings*. Quickstart lets you just go straight into a match for a bit of a punch up without any faffing around. Slugfest gives one or two players the chance to duke it out, while Career mode starts you off on the road to pugilistic stardom.

▲ Take that you red-haired pillock! This'll teach you to dye your hair ridiculous colours now, won't it?

Build Your Own Boxer!

Using the custom boxer facility you can make your own pouting pugilists! Decide on their look then assign them stats and signature moves, or alternatively use the Quick Create option to turn out a range of ready-made fighters in no time at all! But are these oddballs hard enough to beat the champs?

The best boxing game on the N64!

▲ Once the circular gauge has built up to full you can let loose with a super punch which knocks your opponent down every time!

When you begin your career the first thing you should do is train. Although training is optional, if you don't do it you won't get far! Basically, training consists of offensive or defensive workouts. Offensive training involves hitting a sparring partner a specific number of times in 30 seconds. Defensive involves not being hit by a sparring partner a specific number of times in 30 seconds. You're then awarded points depending on your performance, and these points can be used to increase your boxer's three stats – power, speed and stamina.

Training completed (you can only train once before each fight), you then

Punching is handled on the A, B and C buttons with different types of punch coming via combinations of the analogue stick, the Z button and R. If this is all a little complicated for you, it's possible to select One-button Control mode where to access any punch (aside from the signature combos) you simply tap A.

Even though the gameplay is pretty much the same every time – basically you walk into the ring and repeatedly punch your opponent – *Knockout Kings* is nevertheless addictive, even for non-boxing fans – enthusiasts of the sport will doubtless wet themselves with excitement when they see this game!

EA Sports has definitely got a winner on its hands!

take to the ring. At first your opponents are fairly weedy, but as you move up the league table they get harder and faster. As you'd expect from a sports game there are a number of different arenas to fight in, from the dingy meat packers' union ring to the famous one at Caesar's Palace. In *Slugfest* you get to choose the arena, but in *Career* mode the ring reflects your popularity and standing – the better you get, the more glamorous the venue.

Seconds Out!

As far as controls go the boxers respond well, although obviously heavier, slower pugilists react less swiftly than their lighter counterparts.

The audio is absolutely superb, with bags of commentary and a reactive crowd who cheer when the action is exciting, go quiet when it's less so and boo if everything gets too boring. If you like your men beefy (oo-er) and your boxing bloody, then *Knockout Kings* is the game for you! ■

2nd opinion

This is great! Boxing videogames usually tend to be a bit simplistic, but *Knockout Kings 2000* manages to balance ease of play with enough depth and difficulty to keep dragging you back. Definitely one to get if you're a fan of the pugilistic arts. **ANDY McDERMOTT**

Worms: Armageddon

Nostradamus predicted Armageddon would arrive at the end of the 20th Century – he was right!

Price	£39.99

The first *Worms* game appeared on that gaming mainstay the PC sometime around 1994, and was an instant and unprecedented success. Despite containing characters

constructed from only about seven pixels with annoyingly high voices, there was something about mercilessly destroying a friend's carefully-named crawlers with various different weapons that was just so addictive. Now five years on, after enjoying continued success on various videogame formats including the Sega Mega Drive and the PlayStation, *Worms* has finally arrived on the N64 and it's safe to say that it was well worth the wait!

Worms: Armageddon is quite simply the peak of evolution for the *Worms* series. The graphics are large and highly detailed, which gives the worms themselves much more personality and the control system is just perfection. On the PlayStation the control method involved moving the worm with the D-pad and scrolling the screen with the D-pad and the Circle button.

Unfortunately this often resulted in mistakes where people would forget to hold Circle and therefore ended up inadvertently sending their worms tumbling to their death. Not so with the N64, however. Worm movement is handled solely on the C buttons while the analogue stick moves the screen and this works just great, thank you very much!

Indian Nuclear Test

There are all sorts of apocalyptic weapons in *Worms: Armageddon*. The Indian Nuclear Test is one. Activate it and your worm does some totally ineffective goggles, there's a huge flash, the water level rises and every worm gets radiation poisoning – scary!

\$64,000 Question

- More weapons than ever before
- Superbly detailed graphics
- Hilarious animations
- A variety of worm voices
- Challenging puzzle-based mission levels
- Useful weapon training levels
- Play around with practically all the game settings
- Loads of hidden bonuses
- Over-the-top invertebrate carnage
- Decent CPU AI
- Play up to four players on any number of controllers
- It's going to ruin a lot of N64 owners' social lives!

Give 'Em Some Stick!

There are far too many weapons in the game to list here, but these are three of our favourites...

Dynamite

An oldy but a goody! This is perfect for taking out large clusters of worms and does some serious damage!

Baseball Bat

A new one this. Turn your worm into Babe Ruth and knock some enemy worms out of the ballpark!

Sheep

Another old mainstay – the destructive power of dynamite on the hoof! And wait till you see the Super version...

▲ The question mark means that one of the AI opponents is thinking. Fortunately they don't think for too long.

▲ The skunk is one of the new weapons. It runs around emitting a foul cloud of gas that makes worms ill so that their energy drops.

Incoming!

Although the graphics have come a long way since the first *Worms* title, they're not the only feature that's been improved. One of the most important aspects of *Worms* is the weapons and for *Worms: Armageddon*, Team 17 have gone into hardware overload. This game quite simply has more weapons than you know what to do with.

Old mainstays like the shotgun, grenade, bazooka, sheep, air-strike and

problem of dodgy AI for the CPU-controlled crawlers, whereby they'd throw ridiculously accurate grenades every time, making the whole thing just far too frustrating.

I'll Get You!

The good news is that the AI has been sorted for the N64 version. The CPU worms now behave more or less like human opponents – sometimes accurate, sometimes not so accurate, sometimes downright daft. The even better news is that *Worms: Armageddon* has two modes designed specifically for single players. The first of these is Training mode. This consists of a number of different weapon-specific challenges for each element in your

homing missile are still there of course, but they're now complemented by a plethora of other ordnance such as the super sheep, mad cow, baseball bat, battle axe, mole bomb, skunk and even a variety of nuclear attacks!

Until now the only real problem with *Worms* was that the gameplay used to fall down a little when in single-player mode. Although there was always the option of taking on a bunch of CPU teams, playing the computer just didn't have the same buzz as obliterating your mates' worms. There was also the added

arsenal, starting with the basic weapons and eventually (once you've proved yourself worthy) moving onto the powerful stuff.

The second, and most enjoyable, single player section is the Mission mode. This puts a certain number of worms into set levels where you have a specific objective, be it to locate a

weapons crate, assassinate a particular enemy worm or simply eradicate every other worm on screen within a set time limit. While these games might not sound much different from normal play, the range of weapons and utilities you

include extra weapons for your team, like the more powerful ones that you don't initially have access to, and also some hidden gaming modes like the self-explanatory Retro mode and the rather less obvious 'Shopping' mode.

To accompany the improved graphics, Team 17 has come up with some sterling audio too. In addition to the normal squeaky-voiced worms, the little fellows now have a variety of accents including a hard-sounding Scot and a whole team of James Brown soundalikes.

At the end of the day, try as we might we just can't fault this latest, greatest addition to the *Worms* series. Team 17 has improved on just about everything that *could* possibly have been improved on and created a game which is absolutely impossible to put down. *Worms: Armageddon* is quite simply the most addictive game on the N64 so far and the multiplayer is – dare we say it – even more enjoyable than *Goldeneye*! If you only buy one game for your console this century then make it this one! ■

▼ One well-placed explosive device and before you know it it's raining worms! In sudden death time that can be fatal!

Saves standings and lap records

So you've got a really cool sports car. In the real world, this means that every policeman who can support the weight of a radar gun will be pointing it in your direction, no-necks will 'accidentally' run their keys along its paintwork and you'll be constantly challenged at traffic lights by baseball-hatted, pizza-faced jerks in white Ford Orions kitted out with what looks like lengths of UPVC drainpipe stuck under the door sills. In short, it's a drag. But there is an alternative.

Roadsters (now abruptly and mysteriously shorn of the 'Trophy' part of its name) not only allows you to own a large number of exotic high-speed automobiles without the annoyances of insurance, tax and other motorists, but also lets you race them. All the racing is done for money; the more you have, the more cars you can afford! You can also take the slightly cheaper option of upgrading a car you already own, which to begin with is the best way of winning races.

Titus Groan

Originally, Titus' plan was to licence all the cars in the game from their

manufacturers. The realities of finance and dealmaking meant that this wasn't possible; some manufacturers, like TVR, Renault, Toyota and Ford have their names attached to their cars, while others have their vehicles replaced by cunningly-renamed lookalikes. And we *do* mean lookalikes. Hopefully, Titus wasn't planning on fooling any lawyers...

At the start of the game, you have \$25,000 to your name, with which you have to buy a car and pay the entry fee for your first season of racing. Only cars in the lowest-rated group are available to you to begin with, and even then some of them are out of your price

range. Once you've managed to sort out the fiscal side of things, you're ready to race.

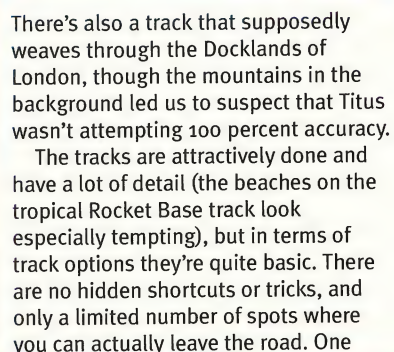

Lotus Position

Roadsters takes place over ten tracks, each of which has reverse and mirror options as well as variable weather conditions. Courses range from the Nevada desert and the mysterious Area 51 to the snow-bound Lumber Mill.

What stands out is the speed!

► It's far too nice a day to be racing about. You should really pull over, jump down to that beach and enjoy the sunshine!

a problem, but it's infuriating in the early stages of the game to get into the lead, only to have the entire pack whip past as you try to reverse out of a trap.

The game actually has an unusual look for an N64 game, lacking the blurriness and washed-out colours found in many titles. In some ways it has the sharpness of a PlayStation title, though obviously without the glitchiness and warped polygons! Despite the presence of some animated trackside features (rolling boulders, helicopters,

Big Pipes

Car handling definitely veers more towards the arcade than reality, but even so there's still a wide variety of characteristics depending on what car you're driving and how it's configured. In

Power Extreme

If you find that your car is starting to get left behind by your rivals, it's time to upgrade it.

The brute force approach is to install a completely new engine! This will affect your car's handling.

You can tweak your car's performance for different tracks by changing the gearbox and suspension settings.

As a last resort, if your car is totally outclassed, you can just shell out for an entirely new set of wheels!

the game it's advisable to upgrade your engine as soon as possible, as this gives you a huge speed advantage over the other drivers in early races, but it is recommended that you shell out the folding stuff for gearbox and suspension

▲ In pit stops, you only have to worry about your choice of tyres – all the work is done automatically when you pull up.

modifications as well to get the most out of your more powerful motor. Getting to grips with the customisation options becomes increasingly important as you progress, since the more powerful cars corner like a supertanker (or the heroes of *Jet Force Gemini*) unless you get under the bonnet and tinker.

Racing does get surprisingly hectic. If there's one thing about *Roadsters* that stands out, it's the speed. The countryside flashes past with no slowdown, making this one of the few racing games where you actually feel as though you're moving at the rate on the

speed. The other cars add to the action, deliberately veering in front of you to block you on corners and sometimes even side-swiping you off the track. The eight characters in the game all have their own little soundbites as one passes another which, although they soon get repetitive, does mean you know who's in what car.

Va-Va-Voom

The only real failing of *Roadsters* is that it reminded us a little too much of Titus' previous racer, *Automobili Lamborghini*. Even though the game engine has supposedly been completely rewritten, there's still that slightly robotic feel to the races. The car handling is better, but falls short of being completely realistic.

Apart from this, *Roadsters* is a great laugh, especially as a four-player game. Thanks to the crisp graphics, you can actually see what's going on in the smaller windows! Unlocking all the cars in mode provides a good incentive to keep coming back for more. It might not be groundbreaking in any way, but *Roadsters* is entertaining and playable, and that's really what counts. ■

2nd opinion

With some hot cars, some nice tracks and pretty good car handling *Roadsters* is an impressive title. While it's not going to make you fall out of your chair with amazement, if you're looking for a top N64 racing game then this is a good bet! **ROY KIMBER**

Milo's Astro Lanes

Mel Brooks would be proud of these Spaceballs!

Space hockey? No. Futurama football then? No. What about black hole basketball then, is that strange enough? Well, no, that isn't daft enough either. The ideal game to play in space is apparently... ten pin bowling. Well, Milo and a bunch of extremely peculiar aliens and robots would have us believe that anyway. So what do you get for your money then? A pair of badly fitting smelly bowling trainers and half a pint of flat Coke for your troubles? No, you get something completely out of this world. And we mean that in the nicest sense.

Milo and said chums bowl. That's all they do. They do it in inimitable style though. Beginning the game in a space lobby you get the chance to select one of the various coloured balls, none of which seem to have any particular advantage over any other but they are

so purdy to look at you feel grateful a choice has been included. Once you've grabbed your balls (missus), you then choose from one of the camp outer space bowlers. Each has their own strengths and weakness but you'll find that with the power ups and special tricks that you acquire during gameplay they all end up with drastically different abilities anyway. Ho-hum.

▲ If this guy hits something other than the pins then he is in serious trouble. He's standing on the poor monster's tongue with dirty shoes on!

Space Bowls

Next it's on to the serious stuff of walloping those balls along the alleys... or aliens' tongues in some cases. Purists and fanatical bowling fans look away now, we are about to blaspheme big time. Unlike conventional bowling games, your characters are given opportunities to pick up bonuses and power-ups. This occurs as your selected ball hurtles towards the neatly stacked triangle of pins. There are four forms to be collected en route, which in turn enhance your pin-striking chances. From white dwarfs, where your ball becomes extremely fast and powerful, to mega balls that increase your ball threefold, each one is a welcome addition to the 'wacky' line-up. Just as there are good balls, there are also bad balls. These are either glued up or shrunk to the size of a pea and can be launched by your opponent if he, she or it feels it is getting a bad deal. All's fair in love and bowling.

Where *Milo's Astro Lanes* loses its footing slightly is with the actual controls. Using the analogue stick to

▲ You'd think that with a brain that size you couldn't miss a thing, but old big bonce does miss a few pins from time to time!

The Fantastic Four

Here are the four bonus balls that can be picked up as you steady those beady eyes on the ten trembling pins!

The White Dwarf

If you manage to secure this rare ball you will have a ball that travels at twice the speed of sound and has a wallop greater than a rhino with a hangover.

Three Way

A three-way ball is exactly what you need if you have a few stray skittles remaining. The middle ball is uncontrollable but each of the outside ones can be directed in as desired.

Mega Ball

Basically, if your balls swell to this size you need to consult a doctor. If are lucky enough to get one like this you are almost guaranteed a strike!

Boost Ball

This is the weakest of the four bonus balls but will give your ball an extra burst of energy to help you over any obstructive jumps and ramps.

Gex 3: Deep Cover Gecko

The return of the slimy superspy!

He's back! Though to be honest, has anyone actually missed him? As videogame heroes go, Gex the gecko is very much a minor-leaguer, marginally above the Zools and Bubsy the bobcats of this world but hardly up there with Mario or Sonic. In fact, he's the Jean Claude Van Damme of videogaming. And that's not intended as a compliment.

Gex 3: Deep Cover Gecko sees the return of the smirking reptile in another 3-D platform escapade. The villain is, once again, the evil Rez (why don't the heroes just *kill* the bad guys at the end of a game?) and this time, as well as trying to take over the world's television screens, he's also kidnapped Gex's partner, Agent Xtra. Since she's played by Baywatch's Marlicee

Gex has apparently been recruited by the government as a secret agent since his last outing; let's hope it's not by the KGB, like that granny from the Home Counties recently. Gex himself isn't very controllable. He has quite a wide turning circle, which often leads to him falling off the edge of platforms, and his jump button frequently doesn't respond quickly enough. The tasks sound fairly varied, with the first level – 'Totally Scrooged' – needing Gex to create five ice sculptures, whack the snowboarding elves and defeat Evil Santa, but most of the time they just involve finding certain objects or killing enemies.

Helping Gex out is Alfred, a tortoise who appears at various points throughout the game to offer advice. He's most useful on the training level, where novice players can get to grips with Gex's range of odd skills, but he also shows up when players may need a helping hand about what to do next.

Jim Morrison

Visually, Gex 3 is a marginal improvement on its predecessor, with colourful levels and some decent animation. On the downside, the game is quite sluggish. It doesn't appear to be slowdown caused by too many objects onscreen at once; instead, the whole pace of the game feels as though it's

suffered from a dodgy camera featuring three different modes, none of which worked right. The sequel only offers two modes... neither of which work right. It's slow to keep up with Gex as he runs around, and there are some points where it just gives up entirely and either hides Gex behind objects or pops abruptly to a new position, usually at the exact moment you're trying to make a precise jump. camera in the last *Gex* game, but it's still a long way from perfect.

Underwater sections are especially infuriating, because the camera has trouble keeping up with you as you turn. One of the tasks that has to be completed in order to win a remote involves swimming around to find and burst air bubbles, and it becomes next to impossible when the camera won't let you see them! Like most games, the controls for swimming are taken straight from *Mario*, meaning there's a lot of flailing about trying to point yourself in the right direction. It's a pity *Gex 3*'s designers didn't take the same approach as *Rayman 2*'s creators and try to come up with a better system.

Oh My Sides

This being a *Gex* game, you expect comedy, right? Well, maybe comedy in a fairly loose sense of the word, but something that's at least *meant* to be funny. Unfortunately, *Gex 3* can't even manage that.

Although the theme of the game still involves taking the mick out of films and TV shows, this round it's not specific targets that get the parody treatment, but instead genres. This actually takes away one of the *Gex* franchise's unique selling points. Okay, so *Gex: Enter The Gecko* wasn't exactly a rib-cracking experience on the scale of *The*

▲ Now this is really taking the pith. Despite Gex's Sherlock Holmes outfit, this level's theme appears to be big-game hunters and savage animals.

general themes – the wild west, World War II, pirates, anime – which in themselves aren't actually funny at all. This kind of comedy relies on getting the details right, but *Gex 3* has scrubbed away specific references to anything and ended up being both bland and unfunny. Many of the levels could have come from just about any platform game.

Gex 3: Deep Cover Gecko joins the long and undistinguished list of acceptably average N64 platform games. It's not terrible in a *Starshot* or *A Bug's Life* kind of way, but nor does it offer anything at all new or special to gamers. Whack a handful of other platformers in a blender, set it on purée, and the goo that results would probably be very similar to *Gex 3*. This may be just what a lot of people want – a game that gives you exactly what you expect. At this stage in the N64's life, though, it's time that developers (and the public) started taking a few more chances. ■

▲ In order to progress, Gex has to kill this giant bug by swallowing a firefly and gobbling flames at it. Once it's dead, new platforms appear.

2nd opinion

Gex is back with all-new costumes and all-new bad guys, but to be honest it's not really an improvement over the original. If you liked the first game then take a look at this for more of the same – if you hated the first one then you're not gonna like *Gex 3* either! **ROY KIMBER**

- It's the N64's first fishing sim
- The full monty for authenticity
- Huge lakes to explore
- Excellent learning curve
- Underwater split-screen sucks a bit
- Fish animations and species variety sorely lacking

Unless you count the one-off sections in *Zelda*, Nintendo fishing fanatics haven't had so much as a nibble when it comes to armchair angling. Which is strange considering other consoles including PlayStation and Dreamcast have been inundated with numerous bass-related titles. *In-Fisherman Bass Hunter 64* (let's call it *IFBH64*) is the very first dedicated fishing simulation featuring those long suffering piscines.

The emphasis is very much on realism, as opposed to instantaneous arcade gratification, but the three difficulty levels and on-line tutorial ensures that it's accessible to seasoned pros and amateurs alike. Just know that to catch the plumpest specimens, certain rules need to be adhered to, such as tackle and lure selection, season, colour and temperature of water, and lake location. Take onboard

all these little nuances and, before long, you'll be hooked! Although it doesn't mean anything to us, the *In-Fisherman* name is big with a capital B in the States, as are all the tackle dealers used throughout.

Strike!

We won't bore you with all their names, but suffice it to say all of the rods, reels, boats, lakes and artificial bait combos are licensed. Other features include expert advice from a top pro, varying light and weather conditions, electronic fish finders and rumble pack nibbles. The latter work well and the trick to hooking bass is knowing when to strike after the fish takes an interest in the bait.

There are two modes of play – Championship and Fishing For Fun, and

maniac, but the graphical detail above and around each lake is excellent.

Okay, you've absorbed all the advice and you want to get your tackle out. After choosing the best bait/rod/reel combination, it's time to cast out your line. There are three ways to do this and there's a metre to gauge how far you toss out the lure. Simple stuff, but effective.

Worm

The real skill of the game is tempting the slimy suckers onto your bait. The graphics underwater are a bit lacklustre, however, and the animations of the fish average to say the least. The AI as they pull the line one way then the other is

admirable, though, and you have to adjust line tension and negotiate potential snags before reeling them in. Lost fish are a common occurrence, but patience, skill and not a little luck reap their rewards as you become more adept at the fineries of bass angling. Winning competitions endows the player with more cash for better equipment and as a consequence of this, bigger hauls of fish.

Take 2 appears to have struck the correct balance of skill with accessibility, making *In-Fisherman Bass Hunter 64* a worthy addition to anybody's software collection. The sound effects are feeble, there's not much commentary and the underwater action could have been better, but Take 2 has laid down the gauntlet for other companies and produced a top-notch example of the genre. With its engrossing angle (sorry) on the sport, we'll be up with the early bird hauling in those beleaguered bass well after the sun goes down. ■

▲ Cue the big grin as you haul... well, swing the skinny little fella into your hands. After, you're told the weight and species of the catch.

▲ When you hook a sizeable fish, it'll run you a merry dance weaving from left to right. If it looks as though your line is going to snap ease off on the drag.

2nd opinion

I have to say that fishing doesn't really interest me and as such I find it hard to get excited about *Bass Hunter*. I can't see anyone not into the sport going for it. That said, it's not a bad fishing game, but at the end of the day it's still a fishing game! **ROY KIMBER**

Call us a bunch of cynical old hacks ("You cynical old hacks!" – A Reader), but Roy quite rightly voiced his disapproval of Disney's decision to churn out a guaranteed big seller with minimum creative input back in issue 24. *Tetris* is undoubtedly a great game, a doddle to play and impossible to put down, but the ploy of new features and novel twists is beginning to wear a bit thin. Okay, so Mickey, Minnie, Goofy and Donald are all involved, each one with their own little set of animations, but dear old Walt must be turning in his grave (well, most of him anyway) at the sight of the Disney characters being so shamelessly marketed. Or maybe he wouldn't...

One day while Donald's out fishing he stumbles across a mysterious shiny purple gem. Where's it from, and what are its powers? And more importantly, who really gives a damn? This attempt at a running storyline may support the feeble Story mode, where a different 'story' unfolds depending on who you choose to play with, but it's business

as usual, ie *Tetris*, in between the dull slideshow plot.

Mickey Mouse Production

What really matters is the variance on the *Tetris* games themselves and this is where the game errs on the innovation front. Not much, mind. Gameplay incorporates the standard puzzle elements of every other *Tetris* puzzler, only Capcom has chucked in a few new shapes, and a welcome Magic system.

How does this work? It's a doddle. To throw magic pieces at your opponent,

players must clear at least two lines simultaneously on their side. This is known as the Magic Attack. To spice things up a tad, any magic attacks can be countered and re-counteracted and so on, but up to a limit. The more Counter moves you can pull off, the nastier and bigger the blocks become. Other modes of play are Up And Down – that's *Tetris* without the magic – and Endless Tetris, without the Story mode. So, not exactly something for everyone and it soon becomes quite tough even on easy. *Magical Tetris Challenge* is yet another bland clone of the classic theme, and one that even Disney's considerable marketing muscle can't rectify. Disappointingly familiar. ■

Rainbow Blood Cheat

Collect 100 ant heads to unlock this cheat, then activate it from the Cheat menu under Options.

Jet Force Kids Cheat

Collect 200 ant heads to unlock this cheat, then activate it from the Cheat menu under Options. It allows you to play as the original child-like Jet Force characters.

Ants In Pants Cheat

Collect 300 ant heads to unlock this cheat then activate it from the Cheat menu under Options. Turns all enemies into stick figures with enormous trousers on!

LEGO RACERS

By the time you read this, *Lego Racers* should be out in the UK, so watch out for the review next issue! In the meantime, here are a couple of codes for it.

No Wheels Mode

Go into Build mode and create a new driver, then go to the Make License screen and put in the driver's name as NWHLS.

Rocket-Powered Car

Go into Build mode and create a new driver, then go to the Make License screen and put in the driver's name as FLYSKYHGH.

Pad at a glance

DUKE NUKEM: ZERO HOUR

It only took about six months to arrive, but arrive it finally did! If you're stuck on GT Interactive's excellent shoot-'em-up then the following information might come in handy...

Titanic Level

To access the hidden Titanic level, Going Down, find all the time machine pieces before you reach The Rack to make a second exit portal appear in a room near to the first.

Wetworld Level

To access the hidden Wetworld level play through the Nukelear Winter stage until you reach the rail tracks leading to the communicator that you have to power up. Drop down onto the roof below where there is a medi kit then jump from this roof into the water and swim to a floating platform to find the hidden level exit.

Cheat Codes

The various cheats in the game are all unlocked in different ways. Here's how to get 'em...

Take your place on the paper podium that is... ScoreZone!

Quite a quiet month for new scores this issue - have you lot all given up? To give you a bit of incentive we've updated the prize for the Ultimate Player from the Trident Pad to the rather cool Logic 3 Top Drive Steering Wheel. The first recipient of this piece of kit is **Luke Kemp** from **Sevenoaks** for his score of **53 yellow gems** on *Mischief Makers* - proving that it doesn't have to be a new game to make you the Ultimate Player. We're still waiting for someone to complete the *Quake II* Time Trial challenge from issue 30 so we'll give you one last chance and set a new challenge next time around. Get Quaking!

ENTER THE ZONE!

Follow these easy steps to achieve entry to the 64 MAGAZINE annals of fame:

- Get a top score or time on an N64 game - without cheating!
- Use a camera or a video to record your time

- List all your scores on a sheet of paper along with your name and address

The complete solution to Ubi Soft's limb-free adventure!

Ski Slope

Mission: Reach The Bottom of The Slope

1: When the game starts, you'll be at the top of the ski slope. Avoid the trees and other obstacles as you go – there are 15 antidotes on the track to collect and a further five for getting to the bottom in the fastest time.

2: The beginning isn't too tough so use it to get the hang of controlling the sled. Collect the antidotes as you go and stick to the right to climb the ramp and enter the small shack on top of the hill.

3: Swerve left and right just before the cavern to avoid the holes in the floor. Hit the booster on the new slope to make a huge jump and then stick to the right to avoid another drop just before the next cavern.

4: Take either of the paths over the gap onto the next section, then stay right to hit another booster. Get in the middle and ride the narrow wooden path over to the drop into the next section.

5: Go hard left and hit the booster, riding the ramp up high and landing on a jump pad. Leap again to land on a high slalom run then drop off the end and hold left to hit another jump pad.

6: When you land, stick to the middle and run along the wooden bridge to the finish. Pass under the banner on the left to continue or go to the right if you fancy having another go on the slopes!

South Plain

1: Once Suzy's told you of her father's plight, run over to the darker patch of grass near her, jump on it and drop into the cave below. Dodge the tomatoes and enter the portal to Doc's Cave.

Trouble

2

Doc's Cave

Mission: Free The Doc!

1: Swim past the mechanical ducks and run down the passage ahead, dodging the poison gas that comes out of the floor. Go right along the ledge beyond ready to cross the lava.

2: Jump over the platforms, but keep moving as they will disappear if you stay still for too long. When you reach the top, enter the portal there to travel over to the next section of the cave.

3: Run forward and dodge the flame jet then climb the ledges to the top. Keep clear of the falling boulders and watch for another flame jet before reaching the top and entering the portal.

4: Fix the machine by moving the box under the pipe and then take the lift up to the top. Eat some popcorn to become Super Ed and bend the bars open before running through the fences to reach the portal.

5: You'll need to kill the corn to progress – stand in front of the targets and side-step when he shoots to rebound the shot and hit him. Do this three times, then cross over to the next portal.

6: Climb the ledges and cross the platforms until you reach the very top of the cliff where another portal awaits. Watch out for the boulder that the Robosuitcase throws towards you!

7: Jump on the floating platform to cross the lava and reach the portal. If you stick to the edge of the platform, you'll have plenty of room to side-step the burning toast that comes flying at you!

8: Go through the door and get the Robosuitcase to chase you onto the metal plate to raise the cage. Eat the popcorn and then beat him up while you're Super Ed to knock him to the floor!

9: Collect the stick and then use it on the socket to the left side of the door to open it. You'll set the Doc free and he'll be chuffed! Now follow him back to his house on the South Plain.

South Plain

2: Next stop is the Vegetable HQ. Go through the large opening behind you and through the portal on the left of the river. Hit the tree to create a bridge and enter the portal on the other side.

The Peashooter

When you get back to the plain, you'll have the chance to try a new weapon out. The peashooter lets you hit targets from a distance—try taking out the mechanical ducks for practice!

You can improve the precision of your aiming by pressing the C Up button to bring up the crosshairs. This makes hitting even the smallest target easy! Now go back and visit the Doc for your next mission.

Enter the next portal along from the Vegetable HQ to reach the North Plain. Hit the left target twice to lower the bridge, move the platforms with your stick and break down the door with your Super Ed powers to find the portal.

Vegetable HQ

Mission: Collect Six Springs

1: Climb the steps and run along the slope at the top to be threatened by a rather fierce Mange Tout. He'll leave some nasty seeds behind, so dodge them and enter the cavern at the end of the ledge.

2: Once the door slams shut, hit the Mange Tout and chase him under the flame jet before burning his head by pressing the button. Get him to hit his tomato friend with the seeds and he'll get knocked into the pit.

3: Press the button in the cage and collect the spring from the platform outside. Ride it through the electric streams and jump off halfway along onto the ledge, going through the portal on the right.

4: Drop into the pit ahead and take care of all the killer Carrots then press the button to open the cage behind you. Hit the button inside to open another gate, climbing the slope back up to the portal.

5: Jump back on the platform and ride through the crusher by hitting the switch on the left. Get onto the ledge and collect the spring, then cross the gap and enter the portal on the other side.

6: Fall off the ledge and use the machine opposite to transform into Super Ed. Smash all the nasty veggies to open the cage on the left then run inside and collect the spring that's waiting for you.

7: Climb the steps back up and jump onto the flying block, using the stick to get it going. Fly ahead and collect the spring in the alcove and then go through the gap on the right and over to the next portal.

8: Jump up the ledges and turn right at the top onto a separate walkway. Run over to the Mange Tout and chase him into the room beyond. Kill him and drop into the hole to the area below.

9: Run to the end past the Carrots and press the button behind the pedestal to activate the flame jet. When all the Carrots are burnt to a crisp, the statue behind will move to reveal another spring and a portal.

10: Go along the ledge to the electric field and shut it down with the button. Jump the gap and continue over the ledge to the alcove on the left where another portal is waiting to be used.

11: Run down the wooden gangplank to the crossroads where two Mange Tout nasties are hanging about. Chase them about until they're dead, making sure you avoid the exploding seeds they throw.

12: With the last two veggies dead, run up the slope to where Suzy is standing. Collect the last spring and then go through the portal to get back to the South Plain and give the Doc his springs!

4

North Plain

Mission: Collect Six Propellers

1: Kill the flying enemy and run left, riding the moving platform to the ledge below. Go right along the carpet and dodge the flame jet in the castle passage to reach the next section of the plain.

2: Jump on the barge and let it carry you over the chasm, leaping onto the platforms that try to knock you off. Kill another hovering nasty and then jump across the clouds to the platform beyond.

3: Collect the first propeller and then get on the brown lift to pass the lava corridor on the left. Stick to the sides to dodge the flame jets and then hit the target on the other side to bring down another platform.

4: Jump aboard and let it take you around and up to the ledge at the top of the castle. Kill the enemy just ahead of you then collect the propeller and enter the archway to continue round the castle.

5: Hit the button on the right and run through the open door, collecting the propeller on the spinning platform. Cross to the rocky ledge and run up it and through the opening at the end.

6: Use the machine to change into Super Ed then jump on the platform and ride it to the top of the spire. Bend the bars to reach the propeller and then get back on board and float back to where you started.

7: Run up the slope to the right and through the opening. Jump on the platform and hit the magnetic targets to pull the platform along. Watch out for traps if you're too slow hitting the next target!

8: Halfway along the magnet track, you can jump off and explore an area to the right. Dodge the flame jets and kill the hovering enemy then collect the propeller and head back to the magnet platform.

9: When you reach the last castle section, cross the walkway and aim your peashooter high to hit a target. Kill the guard inside to get the last propeller and then go back outside and enter the portal on the left.

The Flapping Dickie-Bow

It's important to learn your flying skills quickly. Landing on the platforms isn't too tough but you'll need major control and parachute skills to cross the course of hoops in a single attempt.

Master in-flight peashooting for later on when hitting targets on the go is necessary. Remember to use the parachute to change direction and keep hitting the wind gusts to rise up higher.

To reach the Canyon, run inside the Doc's house and move the shelves aside using your stick on the socket. Go up the stairs and fly off the balcony to find the portal on the other side of the waterfall.

PLAYING GUIDE

5 Canyon

Mission: Collect Six Jumping Stones

South Plain

3: When you give the Doc his Jumping Stones, you'll get the Goldfish Bowl. This lets you dive into deep water and collect all the goodies that are lying around on the bottom of the river!

4: Swim down the river and go through the portal at the end. Follow the shallow water right and dodge the tomato-throwing turnip, entering the next portal on the ledge at the end.

5: Jump into the well and use your Goldfish Bowl to swim through the underwater passage. Get out through the hole in the ice and dodge the electric sparks, entering the portal to the Glacier Cocktail.

1: Jump off the ledge into the hole and activate your bow-tie. Fly down the passage and through the opening, dodging the fan blades and the beams on the other side of them. Use the wind to boost up again.

4: Take a right and follow the passage along, hitting the wind gusts to keep your height. Use the parachute to turn corners gently and duck through another low gap, dodging the beams on the other side.

7: Fall into the hole at the end and fly down the next passage, dodging more snipers and beams. Collect the last Stone from the ledge on the left before flying over to the finish line.

2: Watch for the sniper on the right and go left through the opening, hitting the wind tunnel and flying forwards. Land in the alcove and get the Jumping Stone then fly off again through the fan on the right.

5: Get onto the metal platform in the corner and drop into the pit below. Take out the snipers and collect the two Stones in the eye sockets of the metal head then fly over to the opening on the right.

8: When you reach the last platform, Suzy will open the portal for you back to the South Plain. Of course, even if you've collected all the antidotes you'll still be five short at this stage...

3: Land on the platform and collect another Stone before falling into the next passage. Fly across the lava and dodge the beams, ducking under the low roof and rising up on the next wind gust.

6: Drop down again and fly down the tunnel, shooting the targets with your peashooter to move the obstacles. Collect the Stone from the ledge ahead and then continue down the passage.

9: There's a way to solve this problem - take a look to the left to spot another wind gust in an alcove. If you jump into this, you'll go back to the start of the canyon; if you get the best time, you'll get the last five!

South Plain

6: Run back to the Doc and give him the six feathers you found. As a reward, he'll give you the Chameleon Powder – this lets you change into other creatures when you can't progress as yourself!

7: Head back to the portal leading to the Glacier Cocktail and run past it to the Pyramid portal. Watch as the granny mummy (?) runs inside the pyramid and locks the doors! How will you get in?

8: Go left and stand on the pad, transforming yourself into the granny mummy with your Chameleon Powder. Now just run up to the doors and they'll open, giving you access to the portal!

6 Glacier Cocktail

Mission: Collect Six Feathers

1: Drop into the enclosed area below and take care of the guard there by smacking him from behind. Press the button to open the gate and run through to the next section of the glacier.

4: Go through the portal and round the ledge in the next room to another portal. Move forwards and hit the rocks back at the guards to break the ice, then swim through the dark passage on the right.

7: Swim over and collect the feather floating behind you and then duck through the narrow gap. The cogs will sort themselves out above you, so just remember to collect the feather before you surface.

2: Shoot the flying nasty with your peashooter until he releases the skaters. Change into Super Ed and hit the boulders across to kill all three of them and bring down all the floating platforms.

5: Collect the feather and change into Super Ed, then run back and press the button just outside to freeze the water again. Get the guard to chase you under the ice jet and press the button to freeze him!

8: Climb out and run around the ledge at the top until you reach the button on the wall. Press it to activate the mechanism – the cogs will turn and the door on the left will magically open!

3: Jump on the far left-hand one and cross over, riding up until you reach the feather at the top. Fall back down and take the right-hand lift to the top. Kill the nasty and press the button to open the door.

6: With the ice melted, the water rises. Jump onto the ledge and collect the feather then change into Super Ed and run along to bend the bars. Press the button to raise the water even higher than before!

9: Run inside the opening and collect the last feather before approaching Suzy. She'll open up the portal back to the South Plain for you so that you can go to see her father, the Doc!

Inverted Pyramid

Mission: Collect Six Diamonds

1: Run forward and stand on the large cross to the left of the cat. As the left paw tries to squash you, move so that it lands on the cross and then drop into the hole in the floor before the right paw moves back.

2: Run behind the statue and use your stick on the small rock to move the statue out of the way. Smack the swirl pattern to open the doors and run through, dodging the spikes coming out of the floor.

3: At the end, hit the faces in this order to make them smile: 4, 1, 3, 2. Collect the Domino that drops behind you and slide down the slope that appears into the room below.

4: Run behind the front-left pillar and hit the swirl to create a lift. Do this again to get to the top and fly to the far side to land on the platform. Stand on the floor tile to create a Chameleon plate beneath you.

5: Change into a pillar with your powder to fall through the floor and then run along the passage into the sarcophagus. Collect the Domino from the high ledge and then fall back into the room below.

6: Shoot the target on the ceiling above the pool and then change into Super Ed and knock out the stopper in the middle of the water. Now run down the stairs and into the portal at the bottom.

7: Head for the poisoned water on the left, dropping onto the ledge below and hitting the swirl to lower the spikes and empty the water. Use the sarcophagus and platforms to cross back and enter the portal.

8: Drop down and swim right through the passage to the corridor beyond. Jump the gaps while dodging the boulders, then hit the swirl and jump in the sarcophagus to travel onwards.

9: Fly forwards and drop down, swimming through the next passage and entering the portal. Swim through again, pulling up to make it to the top of the watery tunnel before climbing out.

10: Fall in and swim through the lower passage, pulling up into another room. Change into Super Ed and then run back, bending the bars underwater to access the next Domino.

11: Swim to the surface and climb out, then hit the left-hand pillar to create a bridge. Run up and kill the mummy at the end with your peashooter to open the gate then enter the portal inside.

12: Run through the doors and take out all the wheelchair mummies that attack you. Hit the swirl and drop down to collect the Domino then enter the portal that waits for you at the end.

13: Go through all the arches and change into Super Ed, then double-back, hitting all the swirls to move the walls. Hit the big swirl to rotate the room and then run along the new platform to the far side.

14: Run through past the tap and into the sarcophagus behind the spikes. Change into Super Ed and collect the Domino, then bend the bars and hit the tap to turn it on and fill the bowl with water.

15: Hit the swirl on the far side of the bowl to raise the floor, letting you run over and meet Suzy. Grab the last Domino before you get to her though and then nip through the portal back to the plain.

The Pogo Stick

1: Run back through the South Plain and give the Doc the six Dominoes that you collected in the Pyramid. In return, you'll get the Pogo Stick which is essential for getting across dangerous ground!

2: Practice in Agent XYZ's training room by using the Pogo Stick to hop along the hot coals without falling in the lava. Break through the trap doors to return to the Doc and get your next mission.

3: Go inside the Doc's house and break open the trapdoor in the corner with your Pogo Stick. Drop down and run down the rock passage, dodging the flame jets and entering the portal to the Pressure Cooker.

Pressure Cooker

Mission: Collect Six Wild Piggybanks

South Plain

9: Just as you're about to collect the very last Piggybank, an evil Magic Mushroom appears and steals it! Quick Ed, after him! Go back to the Doc and see what he can do to help you...

10: To chase the Mushroom, you'll need to have collected over 160 antidotes up to this point. When you have, you'll be immune to the effects of the Magic Mushroom's toxic hideout!

11: Run back to where the portal leading to the Pyramid is to catch the Mushroom making his escape. Follow him through the portal on the right-hand side to chase him into his hideout.

1: Move the boxes around in the first room in this order by hitting them to open the door: Right Box - Down, Left, Up; Left Box - Down, Right; Top Box - Right, Down, Left, Down; Left Box - Left, Up.

2: Go through the door and shoot the targets quickly to lift the bars blocking the entrance. Go through and collect the Piggybank, but watch out for the crusher in the ceiling above!

3: Change into a crusher on the Chameleon Pad and press B to squish the guard when he walks underneath. Run through the door and collect the Piggybank, watching for another crusher just ahead.

4: To turn all the switches red, step on the four corners in turn followed by the central button. Collect the Piggybank behind the door and then enter the portal to continue through the level.

5: Run up the ramp and go left, using your stick on the socket to activate the magnet. Drop the boxes onto the steam jets to cool the lava then collect the Piggybank from the platform in the middle.

6: Use your stick on the socket, run through the gap and use the lift to drop down. Cross the platforms then enter the first opening on the right to get another Piggybank and open the doors near the lift.

7: Run back through the passage and move the slide puzzle around to open the door ahead. Go in and change into Grögh, then fool the guard into letting you through to the next area.

8: Use your Pogo Stick to cross the electrified metal path over the lava and enter the portal. Run forward quickly to avoid the rising poison water and climb the platforms to the very top.

9: Use the lift to go up and climb on the crate on the right to go up again. Change into a box to travel through on the conveyor belt and reach the last Piggybank near Suzy and the exit portal.

Magic Mushroom's Hideout

Mission: Get That Last Piggybank Back!

South Plain

12: Run all the way back to see the Doc and give him the last Piggybank. Finally, you'll be able to use his machine to reach Grögh's Lair! Quick, onto the catapult!

Grögh's Lair

Mission: Get The Can Back From Grögh!

1: Head down the slope on your sled, taking care to avoid the nasty electric fields that block your path. There's a path split halfway down, so dodge the flame jets and ride to the opening at the bottom.

2: In the next section, watch for floating mines and more electric fields. Choose a path at the fork and then race down, hitting all of the boosters in the last section to reach the portal at the end.

1: Run left and press the button in the corner to move the bridge, then turn around and quickly cross the platforms to press another button. This opens up the grass to the right of the entrance.

2: Drop into the hole and move the block to the left and right via the socket to create a bridge. Roll the boulders over it to hit the switches and create a lift back up to the high ledge outside.

3: Change into Super Ed with the popcorn on the left, then drop down and run over the bridge, bending the bars open before you change back. You'll now have access to the inside of the lair.

8: Jump down to the left of where you entered and land on the lift there to rise up to a higher ledge. Use the stick on the socket to lower a platform then jump back over to the central junction.

9: Go down the grey slope to the left and change into a boulder on the pad. Roll back up, hitting the bridge to lower it and go through the portal opposite to enter the chamber over on the far side.

10: Run along the walkway and jump the gaps, using your stick in the socket to lower another platform. Take the ramp on the right and cross the bridge, watching for the spikes in the floor.

15: Run along the narrow walkway to meet Grögh's robot. Grögh's at the controls and he doesn't want to give the can back! When he crashes through the floor, drop through the new gap to chase him.

16: As you land, you'll realise that it's not you chasing him... he's chasing you! Run quickly to stay ahead of him and jump the platforms to avoid falling into the poisoned water.

17: When you reach the end, enter the opening in the wall. Turn into Super Ed and punch and kick the boulders towards Grögh to knock him backwards off the ledge into the room below.

3: Through the portal, you'll have to take on the Magic Mushroom. Use your stick to hit back the fireballs he throws out, trying to aim ahead of him so that he runs into them as he moves.

4: Take out all the nasty Mushrooms he plants around you and try to shoot him with your peashooter when he drops his shield to plant more. Once you've hurt him, he'll change his attack...

5: Jump on the platforms that rise out of the floor and dodge the electric bolts he throws at you. Hit him again when he drops his shield but watch for him destroying the platform you're standing on!

6: Eventually he'll go for his final attack. Keep moving to avoid his shots and constantly shoot his shield. When you've knocked it out three times, he'll go down and you'll get the Piggybank!

87

4: Go left along the platform, avoid the floating mines and jump across the platforms to the top. Use your stick in the socket to make a bridge, then drop back down and run over it quickly.

5: Climb the ledges to the top and use your Pogo Stick to stomp on the swirl and crush the guard. Move the rock onto the switch then step on the other switch and shoot the target to open the gate.

6: Run through the portal and over the narrow beams to the opening on the left. The next chamber contains six platforms which you need to locate before you can move on to the next area.

7: From the central junction, go right and jump on the platform there. Shoot the targets as the platform moves round and then go back to the left and activate the socket to bring down the first platform.

11: Carry on to the end and cross the narrow beam, using your stick again to bring down another platform. Now run all the way along the walkway and up the slope back to the top ledge.

12: Drop to the left and run past the angry chef to find another socket. Use your stick to lower another platform and then use the lift at the end to rise up and go back through the portal.

13: Go right and over the narrow beam, using the wooden barge to cross to the ledge in the corner. Use your stick on the socket behind the flames and then cross the ledges to reach the platforms.

14: Jump over the platforms to the end, then turn around and cross back while avoiding the electric fields. Go along the ledge and through the door then enter the opening at the end of the passage.

18: When you drop into the room below, wait for Grögh to activate the magnets around the outside and then fly around, shooting them to turn them off. When they're all down, land on the platform in the middle.

19: When you land, hit Grögh with a peashooter shot to knock him over. Smack a rock over with your stick to open his visor and then shoot him again to hurt him. Watch for the electric sparks he throws at you!

20: When things die down a bit, Grögh will activate the magnets again. You'll have to fly around to shut them off twice more before you'll have a chance to finally get that can back from Grögh!

21: With his robot destroyed, you rush it to confront Grögh. Inside, he's decided that life with the can isn't fun any more – you take it back, Suzy pops up and everyone lives happily ever after!

The complete guide to every N64 game ever reviewed!

Welcome to the Nindex! This section of the magazine contains information on every game we've ever reviewed in ultra-condensed form, meaning you can compare different games at a glance.

If you want to get the lowdown on any N64 game that's been covered in a previous issue, then this is your one-stop buyers' guide. The Nindex is updated every month, and from now on we'll be re-evaluating games from past issues on a regular basis to see just how well they compare to the latest N64 titles. If you need game info, this is where to look!

TEST OF TIME

We take a trip back into the fairly recent past this month, as a triptych of titles from

issue 25 come under the revisionist microscope. Eight issues on, how well do they stand up to the challenge of long-term play?

VIGILANTE 8

Activision • £39.99 • Original Rating: 90%

Although it was a lot of fun to play at the time, as a one-player experience *Vigilante 8* doesn't last all that long – it's too easy to complete. Multiplayer helps out somewhat, but it's no *Goldeneye*. Hopefully *V8 2* will be longer-lasting.

85%

BEETLE ADVENTURE RACING

EA • £39.99 • Original Rating: 92%

Another game that seemed great when reviewed, *BAR* hasn't kept dragging us back. Once you've found all the hidden routes and crates, interest drops off sharply. The Battle mode was short-lived too.

83%

STARSHOT

Infogrames • £44.99 • Original Rating: 44%

We hated it then, so it's not surprising that we still don't like it now. Useless controls, way too many tiny platforms and possibly the world's worst camera all add up to make this a lame also-ran in the overpopulated platform game race.

42%

Game Name	Company	Icons	Issue	Score	Comment
Micro Machines 64 Turbo	Codemasters	1-8 ● ● ● ● ● ● ● ●	23	90%	Superb eight-player (yes, eight) party racing game.
Mike Piazza's Strike Zone	GT Interactive	1-2 ● ● ● ● ● ● ● ●	30	40%	Humdrum baseball game that pales alongside All-Star Baseball.
Mischief Makers	Nintendo	1 ● ● ● ● ● ● ● ●	7	82%	Strange but enjoyable old-school 2-D platformer.
Mission: Impossible	Infogrames	1 ● ● ● ● ● ● ● ●	18	48%	Utterly tosh conversion of the Tom Cruise film.
MK Mythologies: Sub-Zero	GT Interactive	1 ● ● ● ● ● ● ● ●	9	46%	Risible attempt to add platforms to the Mortal Kombat franchise.
Monster Truck Madness	Take 2	1-4 ● ● ● ● ● ● ● ●	31	70%	Crap physics and bugs let down a potentially good racing game.
Mortal Kombat 4	GT Interactive	1-2 ● ● ● ● ● ● ● ●	19	80%	Finally, a decent Mortal Kombat game on the N64!
Mortal Kombat Trilogy	GT Interactive	1-2 ● ● ● ● ● ● ● ●	3	32%	Diabolically bad beat-'em-up.
Multi Racing Championship	Ocean	1-2 ● ● ● ● ● ● ● ●	5	52%	Feeble attempt to make a rallycross game.
Mystical Ninja Starring Goemon	Konami	1 ● ● ● ● ● ● ● ●	13	80%	Wacky RPG/platformer set in a comedy ancient Japan.
Mystical Ninja 2 Starring Goemon	Konami	2 ● ● ● ● ● ● ● ●	29	86%	Enjoyably wacky old-style platform adventure.
NASCAR '99	EA Sports	1-2 ● ● ● ● ● ● ● ●	20	52%	Not very good racing sim that's as dull as the real sport.
Nagano Winter Olympics	Konami	1-4 ● ● ● ● ● ● ● ●	10	65%	Mixed bag of chilly sporting events.
NBA Courtside	Nintendo	1-4 ● ● ● ● ● ● ● ●	16	85%	Probably the best of the many N64 basketball games.
NBA Hangtime	GT Interactive	1-4 ● ● ● ● ● ● ● ●	5	45%	Rubbishy arcade conversion full of silly power moves.
NBA Jam '99	Acclaim	1-4 ● ● ● ● ● ● ● ●	22	83%	Good basketball game that doesn't stand above its competitors.
NBA Live '99	EA Sports	1-4 ● ● ● ● ● ● ● ●	22	75%	Yet another NBA game, offering nothing that stands out.
NBA Pro '98	Konami	1-4 ● ● ● ● ● ● ● ●	12	70%	Uninspiring basketball game with very blurry visuals.
NBA Pro '99	Konami	1-4 ● ● ● ● ● ● ● ●	27	59%	Highly disappointing basketball title.
NFL Blitz	GT Interactive	1-2 ● ● ● ● ● ● ● ●	22	85%	American football game played for laughs and arcade-style action.
NFL Quarterback Club '98	Acclaim	1-4 ● ● ● ● ● ● ● ●	7	80%	Hi-res American football game.
NFL Quarterback Club '99	Acclaim	1-4 ● ● ● ● ● ● ● ●	21	89%	Updated and improved version of NFL QBC '98.
NHL '99	EA Sports	1-4 ● ● ● ● ● ● ● ●	20	88%	The best ice hockey game on the market.
NHL Breakaway '98	Acclaim	1-4 ● ● ● ● ● ● ● ●	12	80%	Early attempt at a hi-res sports game. Not bad.
NHL Breakaway '99	Acclaim	1-4 ● ● ● ● ● ● ● ●	25	74%	Almost identical to Breakaway '98, so out of date!
Nightmare Creatures	Activision	1 ● ● ● ● ● ● ● ●	24	55%	Dog-rough attempt at a horror game.
Off-Road Challenge	GT Interactive	1-2 ● ● ● ● ● ● ● ●	17	27%	Based on Cruis'n USA, and nearly as bad!
Ogre Battle 64	Nintendo	1 ● ● ● ● ● ● ● ●	31	77%	Intriguing strategy/RPG scuppered by reams of Japanese text.
Olympic Hockey '98	GT Interactive	1-4 ● ● ● ● ● ● ● ●	12	70%	Tepid reworking of Wayne Gretzky with Olympic teams.
Penny Racers	THQ	1-4 ● ● ● ● ● ● ● ●	23	66%	Slow and annoying toy racer with a track-building mode.
Pilotwings 64	Nintendo	1 ● ● ● ● ● ● ● ●	1	76%	Slow but intriguing flight sim (of sorts) with lots to do.
Pokémon Snap	Nintendo	1 ● ● ● ● ● ● ● ●	32	88%	Strange but compelling photo-safari game.
Pocket Monsters Stadium	Nintendo	1-4 ● ● ● ● ● ● ● ●	19	46%	Cute-but-dull fantasy animal fighter, intended for young kids.

BEST OF THE BITS

If you want to plug some extra bits into your N64 to enhance your gaming pleasure, these are the ones we recommend most highly!

Nintendo Controller

NINTENDO • £19.99

Without a doubt the best controller you can get for the N64 – since it comes from Nintendo, you'd certainly hope so! If you want to engage in multiplayer fun, we heartily recommend that you get yourself a full set of these.

Grand Prix Racing Wheel II

JOYTECH • (01525) 852900 • £59.99

One of the best wheels around, the Grand Prix – which has an official Jordan team licence – has responsive controls and a realistic feel. It's also very easy to set up, making it a definite race-winner!

4 Meg Memory Card

DATEL • £29.99

Non-Nintendo memory cards have a reputation for being somewhat dodgy and prone to losing your saved game data, but Datel's cards are generally considered the most reliable of the bunch. The 4 Meg model is equal to 16 Nintendo Controller Paks, and lets you access all the pages at once instead of having to flip between them.

Ultra Racer 64

INTERACT • £29.99

It might look weird, but this is actually a very good mini steering wheel. It's ideally suited to F-1 World Grand Prix, so if you're a Formula 1 addict, this is the one for you!

Star Wars: Episode 1 Racer	Nintendo	2 ● ● ●	28	90%	Very fast, but too easy to provide long-term excitement.
Superman	THE Games	1-4 ● ●	30	14%	Truly appalling game with no playability at all.
Super Mario 64	Nintendo	1 ●	1	92%	The first, and still a great, N64 game.
Super Robot Spirits	Banpresto	1-2 ●	20	49%	Useless giant robot fighter.
Tamagotchi World	Bandai	1-4	11	66%	Japanese board game based on Tamagotchis.
Tetrisphere	Nintendo	1-2 ●	10	70%	Interesting but not entirely perfect attempt to move Tetris into 3-D.

64 MAG'S MOST WANTED

PERFECT DARK

Delayed. Until April 2000. Bang. Bang. Bang. (Sound of head repeatedly hitting desk.) Oh well, at least the extra months should make it the best N64 game ever, right? They'd better!

ZELDA GAIDEN

Nintendo UK has given it the rather clumsy title of *The Legend Of Zelda: The Continuing Saga*, but whatever name it goes under, it should be just as good as the first game.

DONKEY KONG 64

Despite being decidedly overpriced, *DK64* is certain to be the N64's number one game this Christmas. Will the barrel of monkeys turn out to be the N64's best platform game?

RESIDENT EVIL 2

Now with proper analogue controls! Based on what we saw at ECTS last month, the N64 version of *RE2* could be the most playable one yet. Watch out for those zombies!

RIDGE RACER 64

There's a lot of competition in the racing game market, but *Ridge Racer 64* has the advantage of an arcade pedigree combined with fast multiplayer action. Review soon!
